PREFACE

Fifty years ago America was caught up in the Second World War. In those difficult times, there was the fear of losing family and friends and even democracy itself. Today Americans are focused on different kinds of fears—crime and violence—that have become a part of everyday life. The fear of crime has settled over communities everywhere, challenging our sense of safety and law enforcement's resources. This fear alters the way we perceive ourselves, our society, and law enforcement.

Reducing crime, as well as the fear it causes, poses a significant challenge. It will require careful planning, based on accurate, detailed, and timely information, along with extensive cooperation of local, state, and federal law enforcement agencies. The National Incident-Based Reporting System (NIBRS) was designed to provide that information, enabling law enforcement to understand and analyze crime more effectively. As NIBRS implementation becomes more and more widespread and the partnership among local, state, and federal law enforcement grows stronger, more information for critical decisions affecting law enforcement priorities and future crime prevention programs will be available.

This publication is a product of the long-standing cooperation among members of the law enforcement community. While it contains important crime information, it also demonstrates law enforcement's ability to work together for a common purpose. The Uniform Crime Reporting Program is continually changing in an effort to enhance and maintain that relationship so law enforcement can meet each and every challenge in the years to come.

CRIME FACTORS

Each year when *Crime in the United States* is published, many entities—news media, tourism agencies, and others with an interest in crime in our Nation—compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, education levels, and prevalent family structures are all key factors in assessing and better understanding the crime issue.

Local chambers of commerce, planning offices, or similar entities provide information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in the United States and in any of the over 16,000 jurisdictions represented by law enforcement contributors to this Program. Valid assessments are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area.
Variations in composition of the population, particularly youth concentration.
Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
Modes of transportation and highway system.
Economic conditions, including median income, poverty level, and job availability.
Cultural factors and educational, recreational, and religious characteristics.
Family conditions with respect to divorce and family cohesiveness.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Citizens' attitudes toward crime.

Crime reporting practices of the citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

Data users are cautioned against comparisons of crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results from the two programs. Appendix IV, "The Nation's Two Crime Measures," contains a detailed description of the NCVS and UCR.

SECTION I

Summary of the Uniform Crime Reporting Program

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of over 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. During 1993, law enforcement agencies active in the UCR Program represented over 245 million United States inhabitants or 95 percent of the total population as established by the Bureau of the Census. The coverage amounted to 97 percent of the United States population living in Metropolitan Statistical Areas (MSAs), 86 percent of the population in cities outside metropolitan areas and in rural counties.

Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the U.S. Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers' Advisory Policy Board (APB) was established in August, 1988. The Board operated until 1993 when a new Board to address all FBI criminal justice information services was approved. The new Board will continue the work of the former APB but will also consider policy issues concerning the National Crime Information Center and FBI identification services.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, FBI automated data processing personnel developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate software revisions needed at the state level. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System or NIBRS, is contained in four documents produced subsequent to the Orange Beach Conference. Volume 1, *Data Collection Guidelines*, contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, *Data Submission Specifications*, is for the use of state and local systems personnel who are responsible for preparing magnetic tapes/floppy disks/etc., for submission to the FBI. Volume 3, *Approaches to Implementing an Incident-Based Reporting (IBR) System*, is for use by computer programmers, analysts, etc., responsible for developing a state or local IBR system which will meet NIBRS' reporting requirements. Volume 4, *Error Message Manual*, contains designations of mandatory and optional data elements, data element edits and error messages.

A NIBRS edition of the UCR Handbook has been produced to assist law enforcement agency data contributors implementing NIBRS within their departments. This document is geared toward familiarizing local and state law enforcement personnel with the definitions, policies, and procedures of NIBRS. It does not contain the technical coding and data transmission requirements presented in Volumes 1 through 4.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than could the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

The pace of NIBRS implementation will be commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January, 1989, and nine state-level UCR Programs (Colorado, Idaho, Illinois, Iowa, North Dakota, South Carolina, Utah, Vermont, and Virginia) are now supplying data in the NIBRS format. An additional 18 state agencies, as well as three local law enforcement agencies in non-Program states and one federal agency (the FBI), have submitted test tapes or disks containing the expanded data. Seventeen other state UCR Programs and agencies in the District of Columbia and Guam are in various stages of planning and development. Test tapes for six of these states, the District of Columbia, and Guam are expected during 1994.

Recent Developments

STATE UCR PROGRAMS – UCR welcomed two states to the ranks of state-level programs, Louisiana and Nevada. In 1993, the Louisiana Commission on Law Enforcement and the Nevada Highway Patrol each commenced collection of UCR data from local law enforcement within their respective states. With their addition, there are now state Programs in 44 states and the District of Columbia.

HATE CRIME STATISTICS – The Hate Crime Statistics Act, passed by the U.S. Congress and signed by the President in April, 1990, mandates a data collection of crimes motivated by religious, ethnic, racial, or sexual-orientation prejudice. Collection commenced January 1, 1991, and the UCR Program has distributed hate crime *Data Collection Guidelines* and *Training Guides* to city, county, and state law enforcement agencies. Training sessions have been held across the Nation to educate federal, state, and local law enforcement agencies in the hate crime reporting procedures. The first annual hate crime publication, which contained 1992 statistics, has been produced, and a 1993 issue is planned for late 1994. Participation continues to grow; 1993 submissions were received from 6,840 law enforcement agencies covering 56 percent of the U.S. population.

VIOLENCE AGAINST POLICE OFFICERS – A "Violence Against Law Enforcement Officers" study funded by a grant from the National Institute of Justice is now underway. It will examine 40 selected incidents of serious assault by *cutting instrument or firearm* where the victim officer *survived* the incident. Extensive interviews of victim officers and convicted assailants are now being conducted, and a special report is planned for 1995. The report will attempt to answer questions raised in the earlier report, *Killed in the Line of Duty*.

The Crime Clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II
Crime Index Offenses Reported

CRIME INDEX TOTAL

DEFINITION

The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1992	14,438,191	5,660.2
1993	14,140,952	5,482.9
Percent change	–2.1	–3.1

[1]Does not include arson. See page 57.

The Crime Index total dropped 2 percent to 14.1 million offenses in 1993, the second consecutive year of decline. In the rural and the suburban counties, the Index was also down 2 percent from 1992, while the cities collectively registered a 3-percent decrease. This downward trend was evident in all city population groups, with those having a million or more inhabitants showing the largest decrease, 5 percent. Five- and 10-year percent changes showed the 1993 national experience was 1 percent lower than the 1989 level but 19 percent higher than the 1984 total.

Geographically, the largest volume of Crime Index offenses was reported in the most populous Southern States, which accounted for 38 percent of the total. Following were the Western States with 25 percent, the Midwestern States with 21 percent, and the Northeastern States with 17 percent. The regions showed Crime Index decreases ranging from 1 to 4 percent during 1993 as compared to 1992. (See Table 4.)

As in previous years, Crime Index offenses occurred most frequently in August and least often in February.

July	9.2	8.9	9.1	9.0	9.1
August	9.3	9.1	9.2	9.0	9.2
September	8.4	8.4	8.4	8.4	8.4
October	8.7	8.7	8.7	8.5	8.6
November	8.1	8.2	8.0	8.0	8.1
December	7.9	8.6	8.3	8.1	9.1

Rate

Crime rates relate the incidence of crime to population. In 1993, there were an estimated 5,483 Crime Index offenses for each 100,000 in United States population. The Crime Index rate was highest in the Nation's metropolitan areas and lowest in the rural counties. (See Table 2.) The national 1993 Crime Index rate fell 3 percent from 1992 and 4 percent from the 1989 level. It was 9 percent above the 1984 rate.

Regionally, the Crime Index rates ranged from 6,220 in the West to 4,613 in the Northeast. The 2-year percent changes (1993 versus 1992) showed declines in all regions. (See Table 4.)

Nature

The Crime Index is composed of violent and property crime categories, and in 1993, 14 percent of the Index offenses reported to law enforcement were violent crimes and 86 percent, property crimes. Larceny-theft was the offense with the highest volume, while murder accounted for the fewest offenses. (See Chart 2.4.)

Property estimated in value at $15.3 billion was stolen in connection with all Crime Index offenses, with the largest losses due to theft of motor vehicles; jewelry and precious metals; and televisions, radios, stereos, etc. Law enforcement agencies nationwide recorded a 34-percent recovery rate for dollar losses in connection with stolen property. The highest recovery percentages were for stolen motor vehicles, consumable goods, livestock, clothing and furs, and firearms. (See Table 24.)

Law Enforcement Response

Law enforcement agencies nationwide recorded a 21-percent clearance rate for the collective Crime Index offenses in 1993 and made an estimated 2.8 million arrests for Index crimes. Crimes can be cleared by arrest or by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. The arrest of one person may clear several crimes, or several persons may be arrested in connection with the clearance of one offense.

The Index clearance rate has remained relatively stable throughout the past 10-year period. As in 1993, the clearance rates in both 1989 and 1984 were 21 percent.

Arrests for Index crimes dropped 2 percent in 1993 when compared to 1992. Adult arrests for Index crimes were down 3 percent, and those of juveniles declined 1 percent. Arrests of males decreased 3 percent for the 2-year period, while those of females increased less than 1 percent.

Considering the individual offenses composing the Index, only murder and aggravated assault showed increases in arrest totals from 1992 to 1993. Decreases for the remaining Index offenses ranged from 1 percent for robbery and arson to 5 percent for burglary.

As in past years, larceny-theft arrests accounted for the highest volume of Crime Index arrests at 1.5 million. (See Table 29.)

1993

Percent Distribution

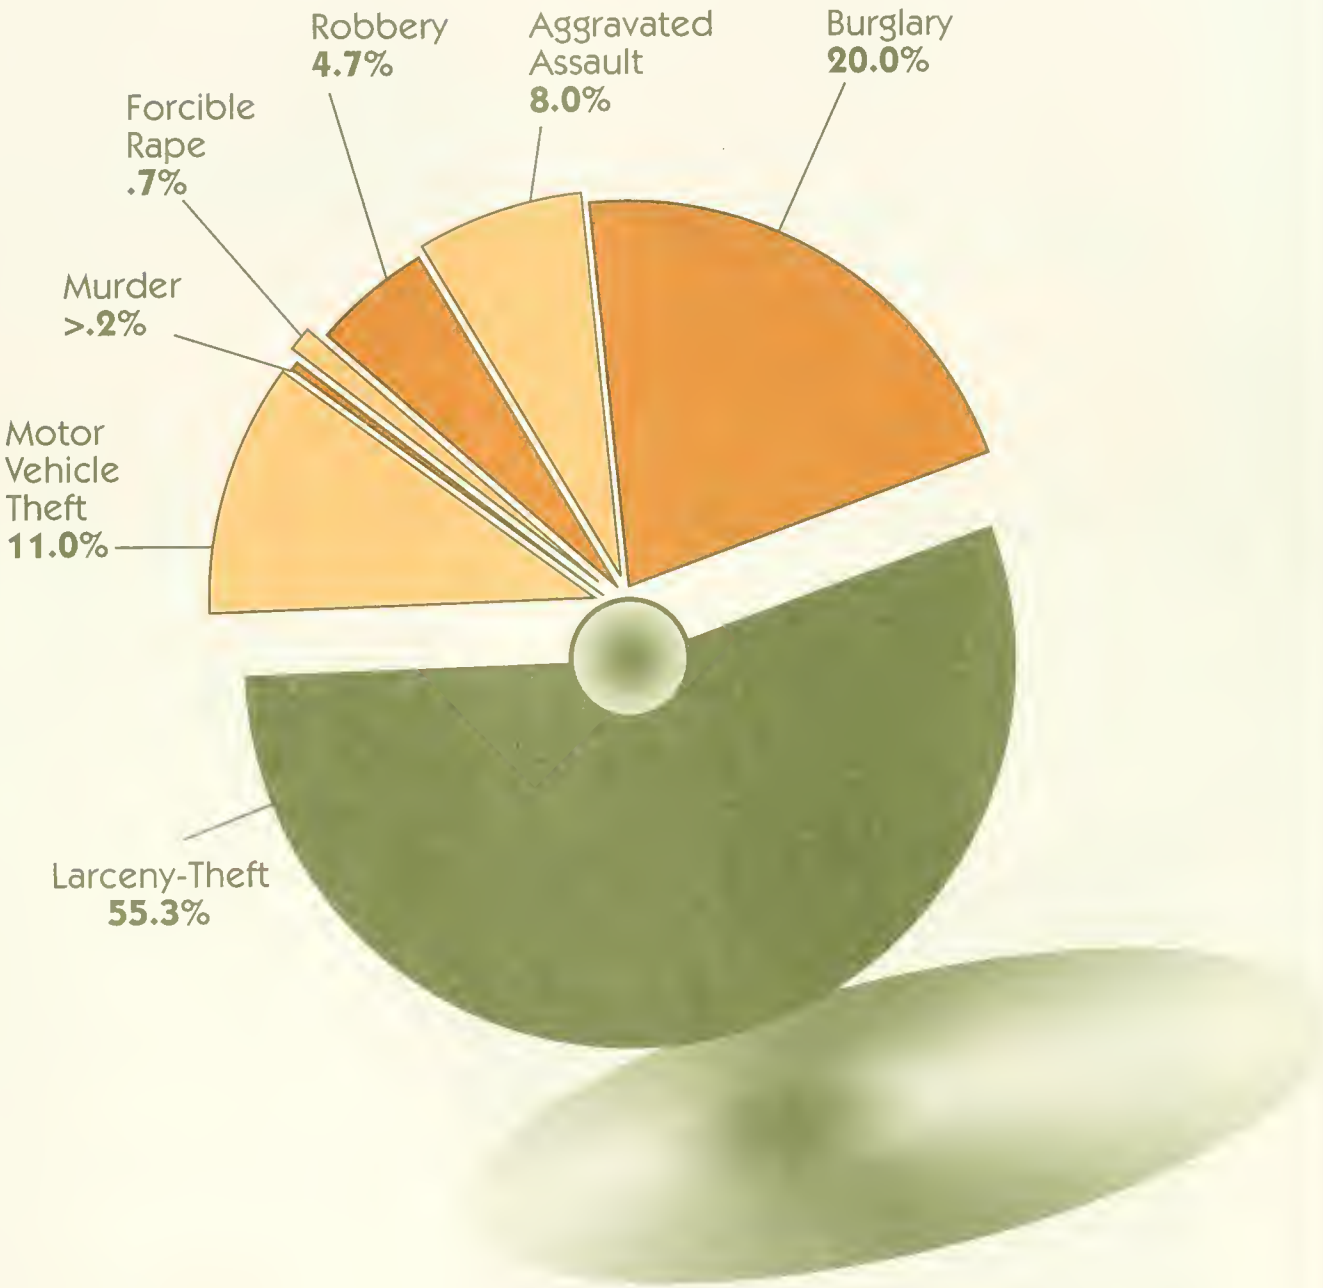

CHART 2.5

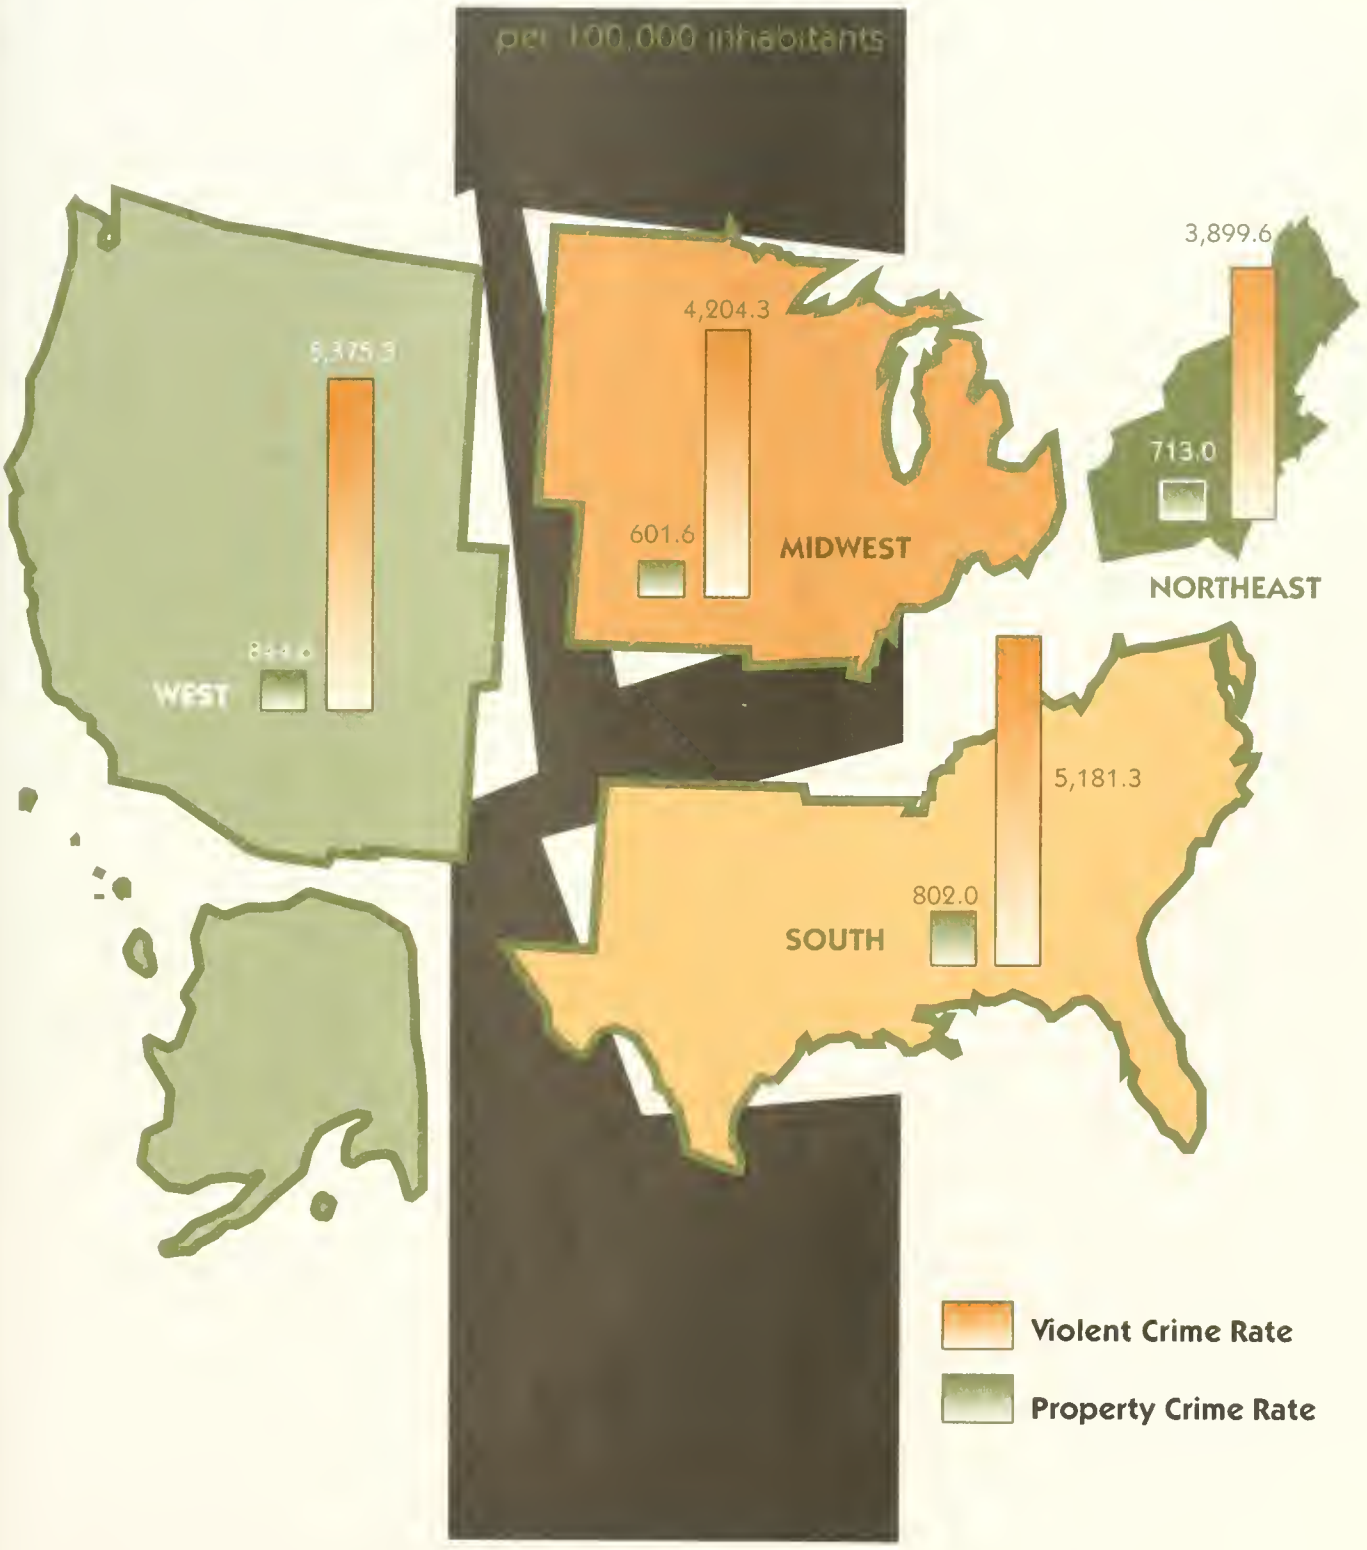
REGIONAL VIOLENT AND PROPERTY CRIME RATES

1993



VIOLENT CRIME TOTAL

DEFINITION

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	1,932,274	757.5
1993	1,924,188	746.1
Percent change	–.4	–1.5

Violent crimes reported to law enforcement during 1993 exceeded 1.9 million offenses, showing a decrease of less than 1 percent from 1992. The annual estimated total was 17 percent above the 1989 level, and 51 percent above that of 1984. From 1992 to 1993, rural counties recorded an increase of 1 percent, while suburban counties experienced virtually no change. The Nation's cities collectively recorded a 1-percent decrease.

Regionally, the South, the most populous region, accounted for 37 percent of all violent crimes reported in 1993. Lesser volumes of 25 percent for the West and 19 percent for both the Midwest and Northeast were recorded. Three of the four regions registered decreases in the numbers of violent crimes reported from 1992 to 1993. The West and Northeast recorded decreases of 1 and 2 percent, respectively, and the Midwestern States experienced a decline of less than 1 percent. The Southern States registered a 1-percent increase. (See Table 4.)

Violent crimes occurred more frequently in July. The lowest total was experienced in the month of February. (See Chart 2.2.)

Table 2.2—Violent Crime Total by Month, 1989-1993

November	8.4	7.9	8.0	7.8	7.8
December	8.2	8.4	8.2	8.0	8.9

Rate

A violent crime rate of 746 per 100,000 inhabitants was registered nationally in 1993. Two-, 5-, and 10-year trends showed the 1993 rate was 2 percent lower than the 1992 rate, 13 percent above the 1989 rate, and 38 percent above the 1984 figure. The violent crime rate was highest in the Nation's cities, which collectively registered 975 offenses per 100,000 population. The suburban counties' rate was 461, and for rural counties, it was 233.

The Western States registered the highest overall violent crime rate per 100,000 inhabitants, 845, and the Midwestern States the lowest, 602. Among the geographic regions, the Northeast experienced a rate decline of 3 percent; the West, 2 percent; and the Midwest and South each 1 percent. (See Table 4.)

Nature

Aggravated assaults accounted for 59 percent of the violent crimes reported to law enforcement during 1993. Robberies comprised 34 percent; forcible rapes, 5 percent; and murders, 1 percent.

While data concerning weapons used in connection with forcible rape are not collected, firearms were the weapons used in 32 percent of all murders, robberies, and aggravated assaults, collectively, in 1993. Knives or cutting instruments were used in 15 percent; other dangerous weapons in 23 percent, and personal weapons (hands, fists, feet, etc.) in 30 percent. The proportion of violent crimes committed with firearms has increased in recent years. In 1989, firearms were employed in the commission of 27 percent of violent offenses.

Law Enforcement Response

The 1993 violent crime clearance rate was 44 percent, down from 45 percent in 1992. Among the violent offenses, the clearance rates ranged from 66 percent for murder to 24 percent for robbery.

There were an estimated 754,110 persons arrested for violent crime in 1993. Violent crime arrests accounted for 6 percent of the total arrests for all offenses and 27 percent of those for Index crimes. Males made up 87 percent of all violent crime arrestees and whites, 53 percent. (See Tables 42 and 43.)

Total arrests for violent crimes rose 1 percent from 1992 to 1993. Adult arrests showed a less than 1-percent decline, while juvenile arrests (under age 18) increased 6 percent. Overall violent crime arrests remained virtually unchanged in the Nation's cities, while increasing 1 percent in suburban counties and 7 percent in rural counties from 1992 to 1993. (See Section IV, Persons Arrested.)

VIOLENT CRIME

CHART 2.6

VARIATION FROM MONTHLY AVERAGE
1993

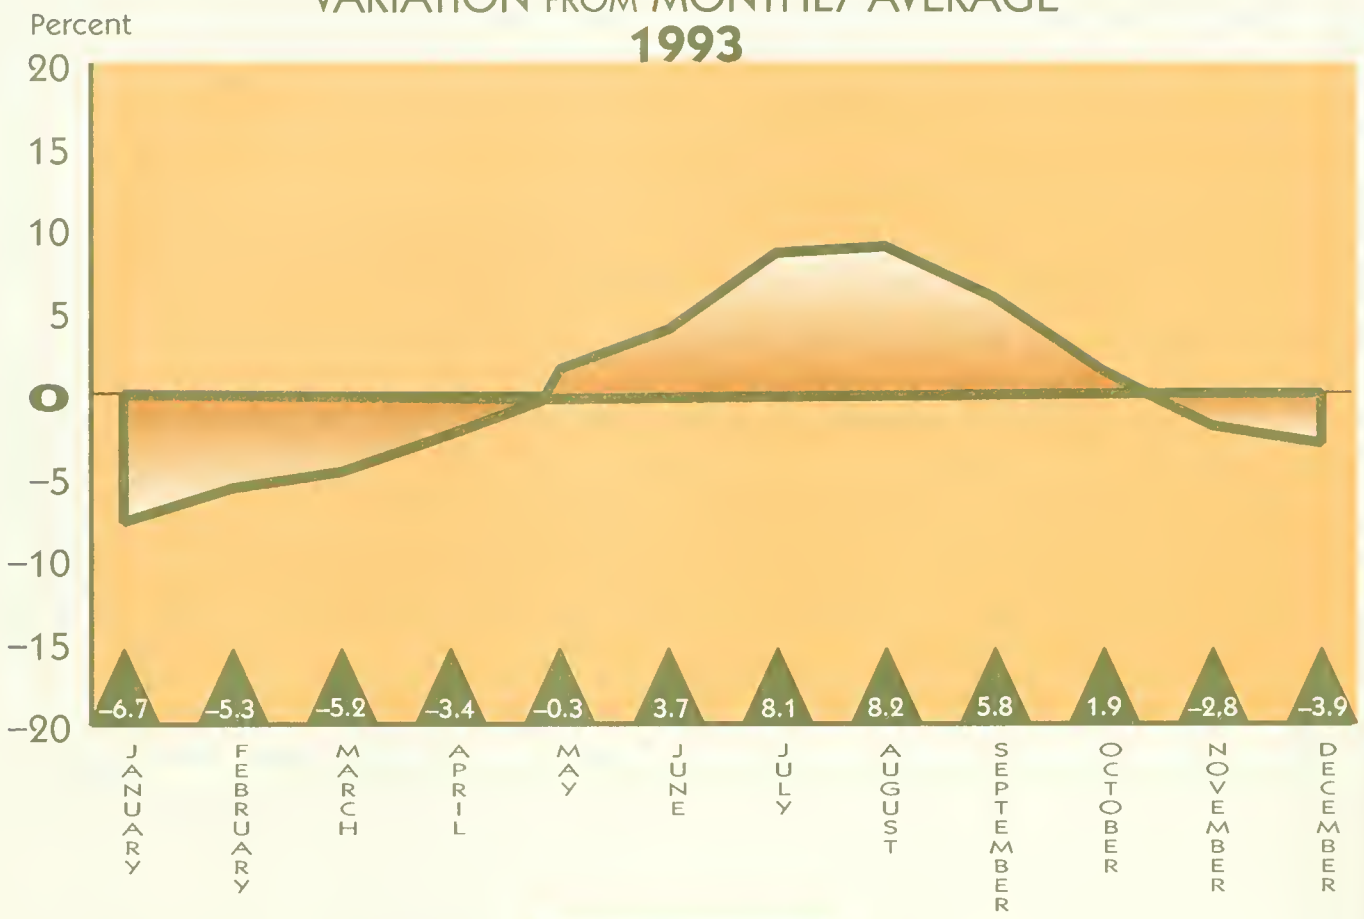

CHART 2.7

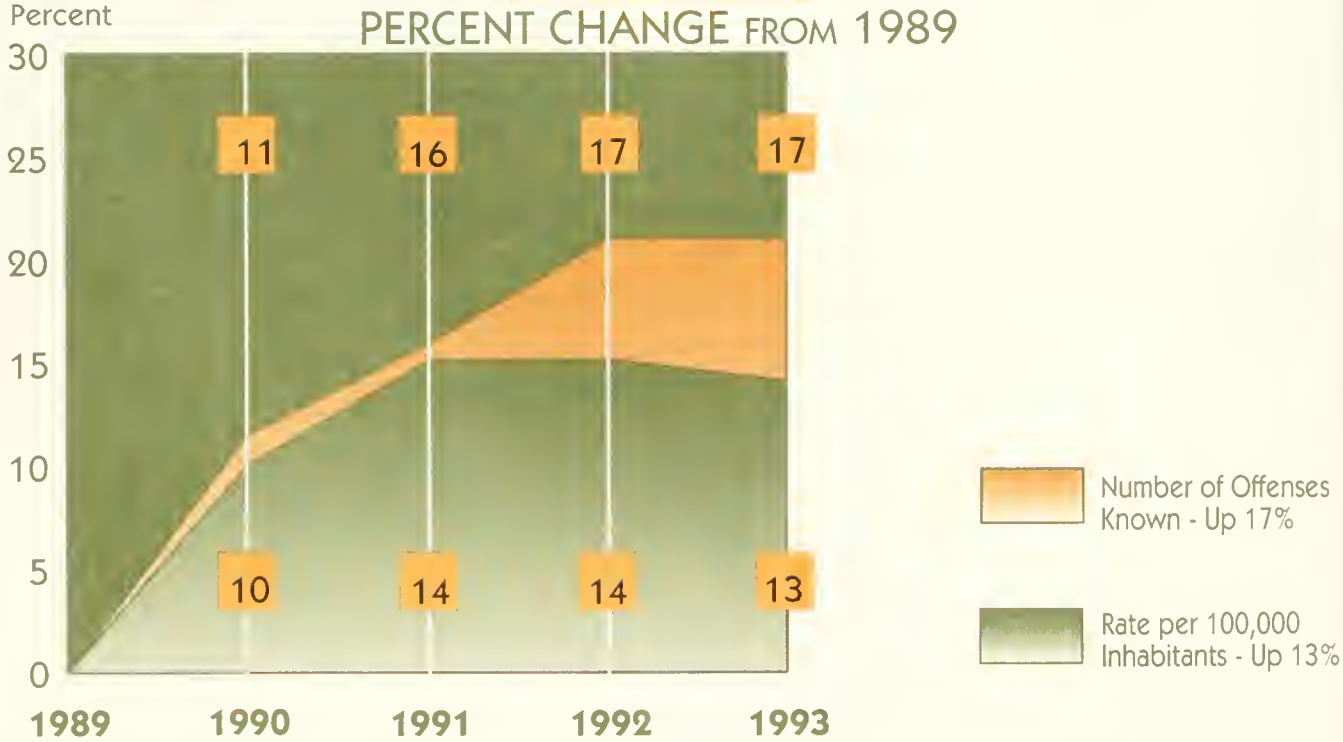
PERCENT CHANGE FROM 1989



MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	23,760	9.3
1993	24,526	9.5
Percent change	+3.2	+2.2

The total number of murders in the United States during 1993 was estimated at 24,526. Monthly figures show that more persons were murdered in the month of December in 1993, while the fewest were killed in February. (See Table 2.3.)

Table 2.3—Murder by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	8.1	7.9	8.0	8.1	8.1
February	7.1	7.0	7.0	7.5	6.7
March	7.8	8.0	7.7	8.2	7.9
April	7.9	7.4	7.8	8.0	7.6
May	7.8	8.1	8.1	8.5	7.8
June	8.2	8.4	8.6	7.9	8.6
July	9.1	9.6	9.1	9.1	9.3
August	9.0	9.3	9.4	9.1	9.2
September	8.8	9.2	8.8	8.7	8.3
October	8.9	8.8	8.6	8.0	8.4
November	8.5	7.6	7.8	8.1	8.2
December	8.7	8.8	9.0	8.8	9.8

When viewing the regions of the Nation, the Southern States, the most populous region, accounted for 41 percent of the murders. The Western States reported 23 percent; the Midwestern States, 19 percent; and the Northeastern States, 17 percent. Among the regions, the Northeast experienced a 5-percent increase; the South and West each recorded 4-percent increases; and the Midwest registered a less than 1-percent increase. (See Table 4.)

The murder volume was up 3 percent nationwide in 1993 over 1992. In the Nation's cities overall, murder increased 4 percent, with the greatest increase—10 percent—registered in cities with populations of 100,000 to 249,999. The greatest decrease—6 percent—was recorded in cities with populations of 10,000 to 24,999. The suburban counties recorded a 2-percent rise in the murder volume and the rural counties, a 3-percent increase for the 2-year period. (See Table 12.)

The accompanying chart reveals a 14-percent rise nationally in the murder counts from 1989 to 1993. The 10-year trend showed the 1993 total 31 percent above the 1984 level.

Rate

Up 2 percent over the 1992 rate, the national murder rate in 1993 was 10 per 100,000 inhabitants. Five- and 10-year trends showed the 1993 rate was 9 percent higher than in 1989 and 20 percent above the 1984 rate.

On a regional basis, the South averaged 11 murders per 100,000 people; the West, 10 per 100,000; and the Midwest and Northeast, 8 per 100,000. Compared to 1992, murder rates in 1993 increased in three of the four geographic regions. The Midwest experienced no change. (See Table 4.)

The Nation's metropolitan areas reported a 1993 murder rate of 11 victims per 100,000 inhabitants. In the rural counties and in cities outside metropolitan areas, the rate was 5 per 100,000.

Nature

Supplemental data provided by contributing agencies recorded information for 23,271 of the estimated 24,526 murders in 1993. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 77 percent of the murder victims in 1993 were males; and 87 percent were persons 18 years of age or older. Forty-eight percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 51 of every 100 were black, 46 were white, and the remainder were persons of other races.

Supplemental data were also reported for 26, 239 murder offenders in 1993. Of those for whom sex and age were reported, 91 percent were males, and 85 percent were persons 18 years of age or older. Seventy-seven percent were aged 15 through 34 years. Of offenders for whom race was known, 56 percent were black, 42 percent were white, and the remainder were persons of other races.

Data based on incidents involving one victim and one offender showed that in 1993, 94 percent of the black murder victims were slain by black offenders, and 84 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (88 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 7 of every 10 murders committed in the United States. Of those murders for which weapons were reported, 57 percent were by handguns, 5 percent by shotguns, and 3 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 13 percent of the murders; blunt objects (clubs, hammers, etc.) in 4 percent; personal weapons (hands, fists, feet, etc.) in 5 percent; and other dangerous weapons, such as poison, explosives, etc., in the remainder. A state-by-state breakdown of weapons used in connection with murder is shown in Table 20.

Total Unknown Sex	11	17	1	22	27	2	22

[1]Data based on 11,721 victims.

Past years' statistics on relationships of victims to offenders showed that over half of murder victims knew their killers. However, in the last few years (1990 through 1993) the relationship percentages have shifted. (Refer to Section V, Homicide Patterns: Past and Present.) In 1993, 47 percent of murder victims were either related to (12 percent) or acquainted with (35 percent) their assailants. Fourteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 39 percent of the murders. Among all female murder victims in 1993, 29 percent were slain by husbands or boyfriends. Three percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 29 percent of the murders during the year. Nineteen percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some type of felonious activity. Three percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. Table 2.14 shows murder circumstances for the past 5 years.

Table 2.9—Murder, Type of Weapons Used, 1993

[Percent distribution by region]

Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Unknown or other dangerous weapons	Personal weapons (hands, fists, feet, etc.)
Total	100.0	69.6	12.7	12.7	5.0

Law Enforcement Response

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide recorded a 66-percent clearance rate for 1993. Eighty percent of murders in rural counties and 65 percent of those in suburban counties and in the Nation's cities were cleared. Of the city population groups, those with populations under 10,000 reported the most successful clearance rate, 76 percent. (See Table 25.)

Geographically, the South, the most populous region, registered the highest murder clearance rate, 71 percent. Following were the Northeastern States with 66 percent, the Midwestern States with 61 percent, and the Western States with 59 percent.

Persons under 18 years of age accounted for 9 percent of the willful killings cleared by law enforcement nationally. Only persons in this young age group accounted for 10 percent of clearances in the Nation's cities, 8 percent of those in the suburban counties, and 7 percent of the rural county clearances. This proportion of juvenile involvement was lower than for any other Index offense.

An estimated 23,400 arrests for murder were made in 1993. Fifty-seven percent of the arrestees in 1993 were under 25 years of age. The 18- to 24-year age group accounted for 41 percent of the total. (See Table 38.)

Ninety-one percent of those arrested were males and 9 percent, females. Blacks comprised 58 percent of the total arrestees for murder in 1993. Whites made up 41 percent, and the remainder were of other races.

Compared to the 1992 level, the 1993 murder arrest total increased 4 percent. Arrests of persons aged 18 and over increased 2 percent, and those of younger persons were up 14 percent. During the same 2-year period, female arrests increased 1 percent and male arrests rose by 4 percent.

Long-term trends indicate the 1993 murder arrest total was 11 percent above the 1989 level and 25 percent higher than the 1984 figure.

Justifiable Homicide

Certain willful killings are classified as justifiable or excusable, based on law enforcement investigation. In Uniform Crime Reporting, justifiable homicide is defined as and limited to the killing of a felon by a law enforcement officer in the line of duty, or the killing of a felon, during the commission of a felony, by a private citizen. These offenses are tabulated independently and are not included in the murder counts.

In 1993, the justifiable homicide total was 811, up 5 percent from the 1992 total of 769 and 28 percent higher than the 1989 total of 636. Of the justifiable homicides in 1993, 455 involved law enforcement officers and 356 were by private citizens. Data on weapons used in connection with justifiable homicide showed that handguns were the weapons used most often. (See Tables 2.16 and 2.17.)

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	109,062	42.8
1993	104,806	40.6
Percent change	–3.9	–5.1

The estimated 104,806 forcible rapes reported to law enforcement agencies across the Nation during 1993 was down 4 percent from the 1992 volume. The 1993 total showed the first decline in forcible rape since 1987 and was the lowest since 1990.

Geographically, 39 percent of the forcible rape total in 1993 was accounted for by the most populous Southern States, 25 percent by the Midwestern States, 23 percent by the Western States, and 14 percent by the Northeastern States. Two-year trends showed that all regions experienced declines ranging from 1 percent in the South to 7 percent in the Midwest and West. (See Table 4.)

Monthly totals show the greatest numbers of forcible rapes were reported during the summer months. (See Table 2.18.)

Table 2.18 – Forcible Rape by Month, 1989-1993

November	8.3	7.7	7.8	7.6	7.5
December	7.3	7.4	6.8	7.0	7.7

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1993, an estimated 79 of every 100,000 females in the country were reported rape victims, a rate decrease of 6 percent from 1992. The 1993 female forcible rape rate was, however, 5 percent higher than the 1989 rate.

In 1993, there were 84 victims per 100,000 females in MSAs, 76 per 100,000 females in cities outside metropolitan areas, and 49 per 100,000 females in rural counties. Although MSAs record the highest rape rates, they have shown the smallest change over the past 10 years. During this time, the greatest rate increase was shown in cities outside metropolitan areas, 90 percent. Rural counties recorded a 44-percent rate rise, while MSAs showed a lesser increase, 6 percent.

Regionally, in 1993, the highest female rape rate was in the Southern States, which recorded 88 victims per 100,000 females. Following were the Western States with a rate of 84, the Midwestern States with 83, and the Northeastern States with 55. Over the last 10 years, regional increases in the female forcible rape rate were 30 percent in the Midwest, 21 percent in the South, and 4 percent in the Northeast. A 3-percent decrease was reported in the West. All regions showed declines, 1992 versus 1993.

Nature

Rapes by force constitute the greatest percentage of total forcible rapes, 87 percent of the 1993 experience. The remainder were attempts or assaults to commit forcible rape. The number of rapes by force decreased 3 percent in 1993 from the 1992 volume, while attempts to rape decreased 12 percent.

As for all other Crime Index offenses, complaints of forcible rape made to law enforcement agencies are sometimes found to be false or baseless. In such cases, law enforcement agencies "unfound" the offenses and exclude them from crime counts. The "unfounded" rate, or percentage of complaints determined through investigation to be false, is higher for forcible rape than for any other Index crime. In 1993, 8 percent of forcible rape complaints were "unfounded," while the average for all Index crimes was 2 percent.

Law Enforcement Response

Nationwide, as well as in the cities, over half of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means in 1993. Rural and suburban county law enforcement agencies cleared a slightly higher percentage of the offenses brought to their attention than did city law enforcement agencies. (See Table 25.)

Geographically, clearance rates for the regions were lowest in the Western States and highest in the Southern States. (See Table 26.)

Of the total clearances for forcible rape in the country as a whole, 14 percent involved only persons under 18 years of age. The percentage of juvenile involvement varied by community type, ranging from 13 percent in the Nation's cities to 20 percent in suburban counties. (See Table 28.)

Law enforcement agencies made an estimated 38,420 arrests for forcible rape in 1993. Of the forcible rape arrestees, about 3 of every 10 were in the 18- to 24-year age group. Over half of those arrested were white. (See Tables 38 and 43.)

The number of arrests for forcible rape fell 2 percent nationwide from 1992 to 1993. A decrease of 4 percent was experienced in the Nation's cities, and a 1-percent decline was recorded in the suburban counties. Forcible rape arrests were up 10 percent in the rural counties for the 2-year period. (See Tables 44, 50, and 56.)

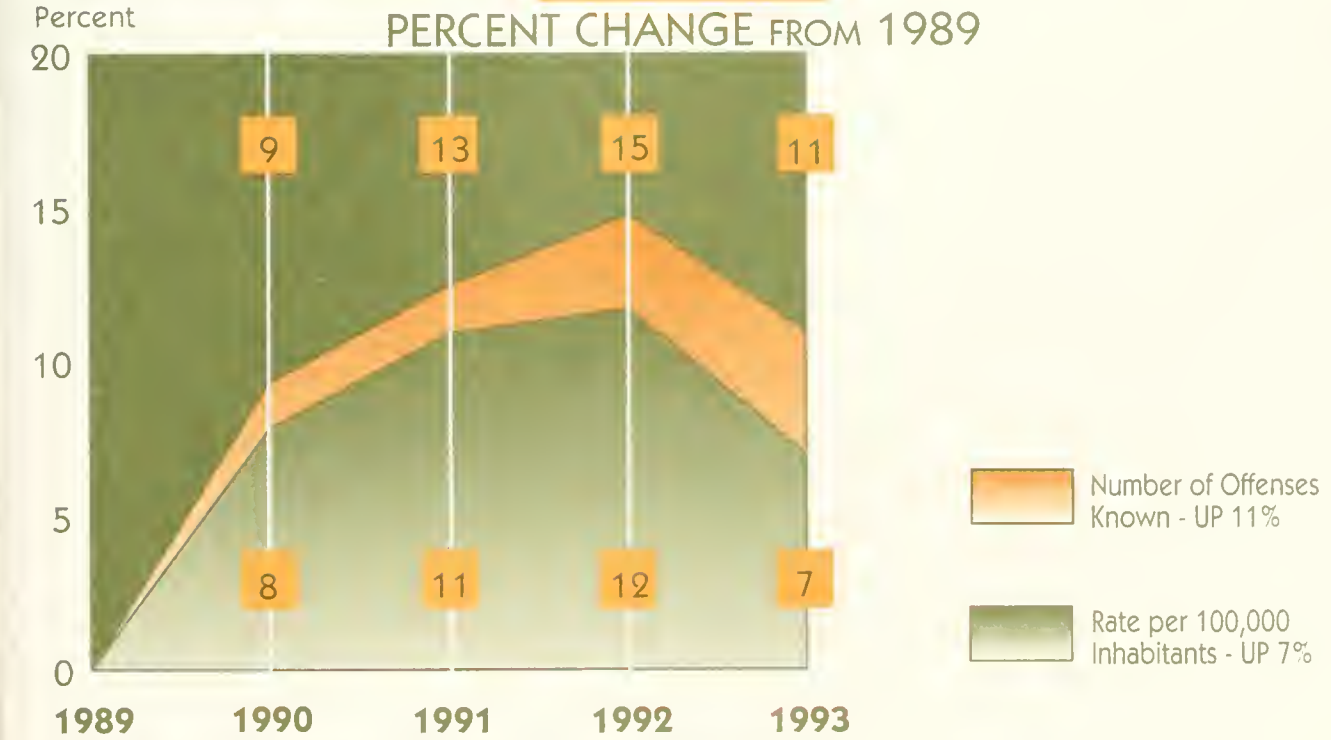
PERCENT CHANGE FROM 1989



ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	672,478	263.6
1993	659,757	255.8
Percent change	–1.9	–3.0

Reported robberies in 1993 were estimated at 659,757 offenses, accounting for 5 percent of all Index crimes and 34 percent of the violent crimes. During the year, robberies occurred most frequently in December and least often in February.

Table 2.19 – Robbery by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	8.8	8.7	8.7	9.0	8.8
February	7.4	7.3	7.5	8.0	7.1
March	8.0	8.1	8.0	8.1	8.3
April	7.3	7.2	7.4	7.8	7.4
May	7.6	7.7	7.8	7.9	7.5
June	7.6	7.8	7.8	7.9	8.1
July	8.4	8.5	8.4	8.4	8.7
August	8.6	8.8	8.8	8.6	8.8
September	8.6	8.6	8.5	8.3	8.4
October	9.2	8.9	9.2	8.7	9.0
November	9.0	8.7	8.7	8.3	8.5
December	9.3	9.6	9.2	9.0	9.4

Compared to 1992 levels, the 1993 robbery volume decreased 2 percent nationally, in the Nation's cities, and in the suburban counties. It declined 1 percent in the rural counties. This downward trend was also evident in most city population groups. The largest decline – 4 percent – was experienced in cities with a million or more inhabitants. (See Table 12.)

Distribution figures for the regions showed that the most populous region, the Southern States, accounted for 32 percent of all reported robberies. (See Table 3.) Two-year trends show the number of robberies in 1993 was down in all regions as compared to 1992. The declines were 4 percent in the Northeast, 2 percent in the West, and 1 percent in the Midwest and South.

Chart 2.13 depicts the national trend in the robbery volume, as well as the robbery rate, for the years 1989-1993. In 1993, the number of robbery offenses was 14 percent higher than in 1989 and 36 percent above the 1984 total.

Rate

The national robbery rate in 1993 was 256 per 100,000 people, 3 percent lower than in 1992. In metropolitan areas, the 1993 rate was 312; in cities outside metropolitan areas, it was 71; and in the rural areas, it was 16. With 955 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants. (See Table 16.) A comparison of 1992 and 1993 regional robbery rates per 100,000 inhabitants showed the Northeastern and Western States' rates of 323 and 283, respectively, down 4 percent; and the rates of 204 in the Midwest and 236 in the South each down 2 percent.

Nature

In 1993, a total estimated national loss of $538 million was attributed to robberies. The value of property stolen during robberies averaged $815 per incident, down from $840 in 1992. Average dollar losses in 1993 ranged from $449 taken during robberies of convenience stores to $3,308 per bank robbery. (See Table 23.) The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (55 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types. A comparison of 1992 and 1993 robbery totals by type showed robberies of convenience stores were down 8 percent; gas or service station robberies dropped 6 percent; and street/highway robberies declined 2 percent. Increases of 2 percent or less were recorded for the other categories. (See Table 23.)

[1]Because of rounding, percentages may not add to totals.

Forty-two percent of robberies in 1993 were committed with firearms. Strong-armed tactics were used in 38 percent, knives or cutting instruments were used in 10 percent, and other dangerous weapons in the remainder. A comparison of 1992 and 1993 robbery totals by weapon showed those by knives or cutting instruments dropped 8 percent; those by strong-arm tactics decreased 6 percent; and those by other dangerous weapons were down 4 percent. Robberies by firearms showed the only increase, up 4 percent since 1992. A state-by-state breakdown of weapons used in robberies in 1993 is shown in Table 21.

Table 2.22—Robbery, Type of Weapons Used, 1993

Western States	100.0	40.3	10.1	11.3	38.2

[1]Because of rounding, percentages may not add to totals.

Law Enforcement Response

The 1993 national robbery clearance rate was 24 percent. In the Nation's cities, the clearance rate was 23 percent, and in the suburban counties, 25 percent. The highest robbery clearance rate—39 percent—was registered by rural county law enforcement agencies. (See Table 25.) Regional robbery clearance percentages ranged from 19 percent in the Midwest to 27 percent in the South. (See Table 26.)

Nationally, persons under the age of 18, exclusively, were the offenders in 17 percent of all 1993 robbery clearances. This age group accounted for 20 percent of the suburban county clearances, 16 percent in the Nation's cities, and 13 percent of those by rural county agencies.

Arrests for robbery declined 1 percent nationwide and in cities during 1993 when compared to 1992. For the same 2-year period, the number of persons arrested for robbery was down 7 percent in the suburban counties and 4 percent in the rural counties.

Sixty-two percent of all robbery arrestees in 1993 were under 25 years of age, and 91 percent were males. Sixty-two percent of those arrested were black, 36 percent were white, and the remainder were of other races.

The total number of robbery arrests was up 9 percent during the 5-year period, 1989-1993. For the same timespan, arrests of males for robbery also rose 9 percent, and female arrests increased 11 percent. Juvenile arrests rose 37 percent, and those of persons 18 years of age and older increased 1 percent.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	1,126,974	441.8
1993	1,135,099	440.1
Percent change	+.7	−.4

Totaling an estimated 1,135,099 offenses nationally, aggravated assaults in 1993 accounted for 59 percent of the violent crimes. Geographic distribution figures show that 40 percent of the aggravated assault volume was accounted for by the most populous Southern Region. Following were the Western Region with 25 percent, the Midwestern Region with 19 percent, and the Northeastern Region with 16 percent. Among the regions, only the Northeast registered a decline in the number of reported aggravated assaults. (See Table 4.)

The 1993 monthly figures show that the greatest number of aggravated assaults was recorded during July, while the lowest volume occurred during February.

Table 2.23 – Aggravated Assault by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	7.5	7.4	6.9	7.3	7.5
February	6.6	6.7	6.6	7.3	6.5
March	7.9	7.8	7.7	8.0	8.1
April	8.1	8.2	8.1	8.7	8.3
May	8.9	9.0	9.1	9.2	8.9
June	8.9	9.4	9.3	8.9	9.1
July	9.6	10.1	9.7	9.4	9.6
August	9.2	9.3	9.9	9.1	9.2
September	8.8	8.9	9.0	8.6	8.3
October	9.1	8.3	8.6	8.5	8.5
November	7.9	7.4	7.6	7.6	7.4
December	7.5	7.5	7.6	7.4	8.6

In 1993, aggravated assaults were up 1 percent nationwide as compared to 1992. For the same time period, cities collectively experienced an increase of less than 1 percent in the aggravated assault volume. Percent changes among the city population groupings ranged from 4-percent increases in cities with 100,000 to 249,999 inhabitants and in those with 500,000 to 999,999 to a 2-percent decline in cities with 1,000,000 or more inhabitants. The suburban counties registered a 1-percent increase and the rural counties, a 2-percent rise for the 2-year period. (See Table 12.)

Five- and 10-year trends for the country as a whole showed aggravated assaults up 19 percent over the 1989 level and 66 percent over the 1984 experience. (See Table 1.)

Rate

Down less than 1 percent from the 1992 rate, there were 440 reported victims of aggravated assault for every 100,000 people nationwide in 1993. The rate was 15 percent higher than in 1989 and 52 percent above the 1984 rate.

Higher than the national average, the rate in metropolitan areas was 486 per 100,000 in 1993. Cities outside metropolitan areas experienced a rate of 389, and rural counties, a rate of 176.

Regionally, the aggravated assault rates ranged from 510 per 100,000 people in the South to 348 per 100,000 in the Midwest. Compared to 1992, 1993 aggravated assault rates were down 1 percent in the Northeast and West and less than 1 percent in the South. Rates in the Midwest showed a less than 1-percent increase. (See Table 4.)

Nature

In 1993, 31 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 26 percent of the offenses; firearms in 25 percent; and knives or cutting instruments in the remainder.

From 1992 to 1993, assaults with knives or cutting instruments fell 1 percent and those with personal weapons (hands, fists, and feet) declined 3 percent. Those involving blunt objects or other dangerous weapons showed virtually no change. Similar to the murder experience, those with firearms increased 5 percent. State-by-state totals for weapons used in assaults during 1993 are shown in Table 22.

Table 2.24 – Aggravated Assault, Type of Weapons Used, 1993
[Percent distribution by region]

Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	25.1	17.6	31.0	26.3

AGGRAVATED ASSAULT

CHART 2.15

VARIATION FROM MONTHLY AVERAGE

1993

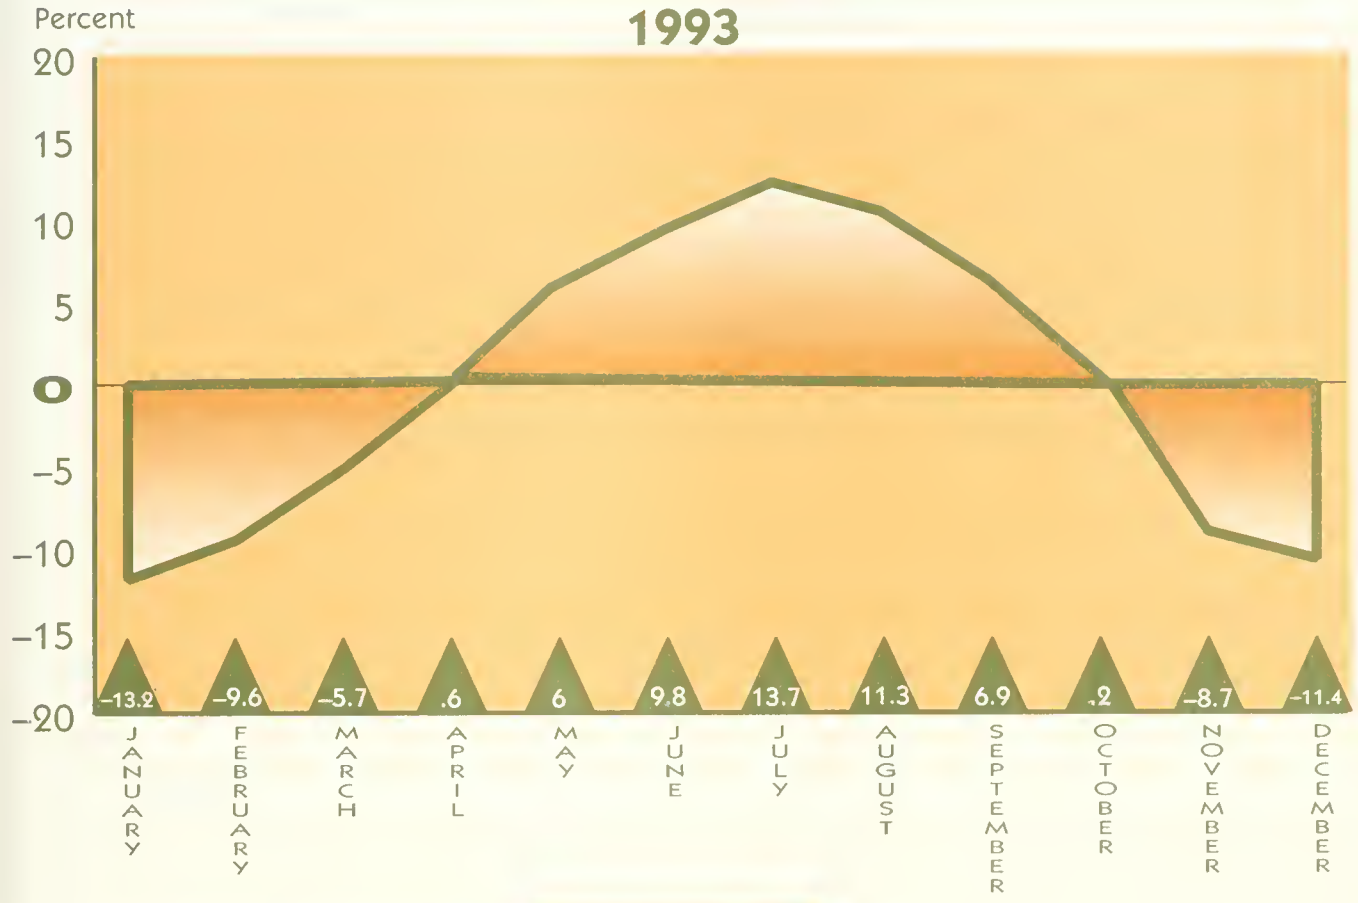

CHART 2.16

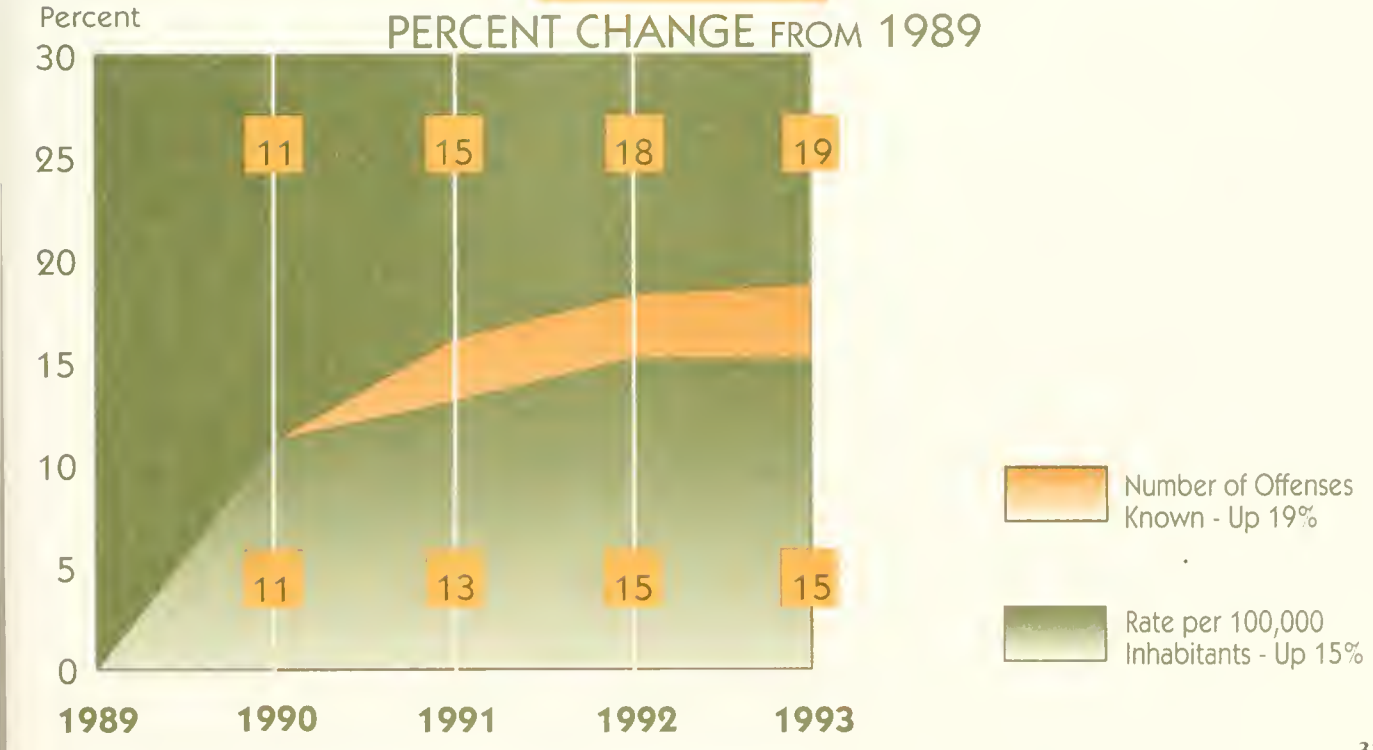
PERCENT CHANGE FROM 1989



Law Enforcement Response

During 1993, law enforcement agencies nationwide recorded a 56-percent aggravated assault clearance rate. The cities collectively reported 54 percent cleared, while the suburban and rural county law enforcement agencies cleared 59 and 62 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest clearance rate, 63 percent. (See Table 25.)

Regional clearance percentages for aggravated assault were 58 percent in the West, 57 percent in the South, 55 percent in the Northeast, and 50 percent in the Midwest.

Thirteen percent of the clearances reported nationally and in cities involved only persons under age 18. Persons in this age group were identified as the assailants in 14 percent of the clearances in the suburban counties and 10 percent of those in the rural counties.

The estimated 518,670 persons arrested for aggravated assault in 1993 represented two-thirds of all arrestees for violent crimes. Whites comprised 58 percent of the arrestees; blacks, 40 percent; and all other races, the remainder. Eighty-four percent of the arrestees were males and 16 percent, females.

Total arrests for aggravated assault were up 1 percent in 1993 from the 1992 total. During this 2-year period, arrests of persons under age 18 were up 6 percent, and arrests of adults increased 1 percent. A comparison of 1989 and 1993 figures showed increases of 15 percent for total arrests, 37 percent for juvenile arrests, and 12 percent for adult arrests.

PROPERTY CRIME TOTAL

DEFINITION

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of these offenses is the taking of money or property, but there is no force or threat of force against the victims.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1992	12,505,917	4,902.7
1993	12,216,764	4,736.9
Percent change	–2.3	–3.4

[1]Does not include arson. See page 57.

The estimated property crime total decreased to 12.2 million reported offenses in 1993, the lowest total since 1987. The 1993 volume was 2 percent lower than the 1992 level. (See Table 1.).

Regional property crime declines were 5 percent in the Northeast, 3 percent in the Midwest, 2 percent in the South, and 1 percent in the West. All city population groups also showed property crime decreases, with the greatest drop (5 percent) in cities with populations of 1 million or more. Rural and suburban county law enforcement agencies each recorded 2-percent decreases in their property crime totals during 1993. (See Table 12.)

As in previous years, 1993 monthly figures show more property crime occurred in August, while the lowest total was reported in February.

Table 2.25 – Property Crime Total by Month, 1989-1993
[Percent distribution]

October	8.6	8.7	8.7	8.5	8.6
November	8.1	8.2	8.0	8.0	8.1
December	7.9	8.6	8.4	8.1	9.1

Rate

In 1993, there were an estimated 4,737 property crimes for every 100,000 United States inhabitants. The 1993 property crime rate was 3 percent lower than the 1992 rate and 7 percent under the 1989 rate but 5 percent above the 1984 rate.

Geographically, the 1993 property crime rate declined in all regions. The rates of 5,375 per 100,000 in the West and 5,181 in the South were each down 3 percent. The rate of 4,204 in the Midwest represented a 4-percent decrease; and the Northeast's rate of 3,900, a 5-percent decline.

Property crime rates for 1993 were 5,193 in metropolitan areas, 4,799 in cities outside metropolitan areas, and 1,749 in rural counties. By population group, the highest rate — 8,510 — was recorded in cities with populations from 250,000 to 499,999. (See Table 16.)

Nature

Total dollar losses due to property crime were estimated at $14.8 billion in 1993, down from $15.2 billion in 1992. The average loss per offense in 1993 was $1,212, as compared to $1,217 in 1992.

In 1993, larceny-theft accounted for 64 percent of all property crime. Burglary accounted for 23 percent and motor vehicle theft for 13 percent. Although arson is excluded from the property crime offense and clearance tabulations because of its lower national coverage, it accounted for another 95,764 offenses reported by 11,860 agencies. An average of $16,616 was lost per arson in 1993, based on data from 11,743 law enforcement agencies. The average loss per arson in 1993, although slightly down from the 1992 average, was largely influenced by arson damages in forested areas of California. While the fires spread and destroyed various properties, their points of origin were in the forest.

Regionally, 38 percent of property crime was accounted for by the Southern States, 25 percent by the Western States, 21 percent by the Midwestern States, and 16 percent by the Northeastern States.

Law Enforcement Response

Property crimes generally have lower clearance rates than violent crimes, and in 1993, the overall property crime clearance rate was 17 percent, as compared to 44 percent for violent crime. Geographically the Midwest's 1993 property crime clearance rate equalled the Nation's, 17 percent. In two of the four regions, the South and West, property crime clearance rates of 18 percent were recorded. The Northeast recorded a lesser rate of 16 percent. (See Table 26.)

Twenty-three percent of the property crimes cleared by law enforcement nationwide and in cities in 1993 involved only young people under age 18. The juvenile percentage was 24 percent in suburban counties and 21 percent in rural counties. (See Table 28.)

The estimated 2.1 million persons arrested for property crimes in 1993 accounted for 15 percent of all arrestees. The volume of property crime arrests in 1993 was 3 percent below the 1992 level and 6 percent lower than the 1989 total but 13 percent above the 1984 experience. Compared to 1992 totals, juvenile and adult property crime arrests in 1993 declined 2 and 4 percent, respectively, nationwide. (See Tables 32, 34, and 36.)

In 1993, 74 percent of all property crime arrestees were males. Sixty-four percent of the total were white, and 33 percent were under age 18.

PROPERTY CRIME

CHART 2.17

VARIATION FROM MONTHLY AVERAGE

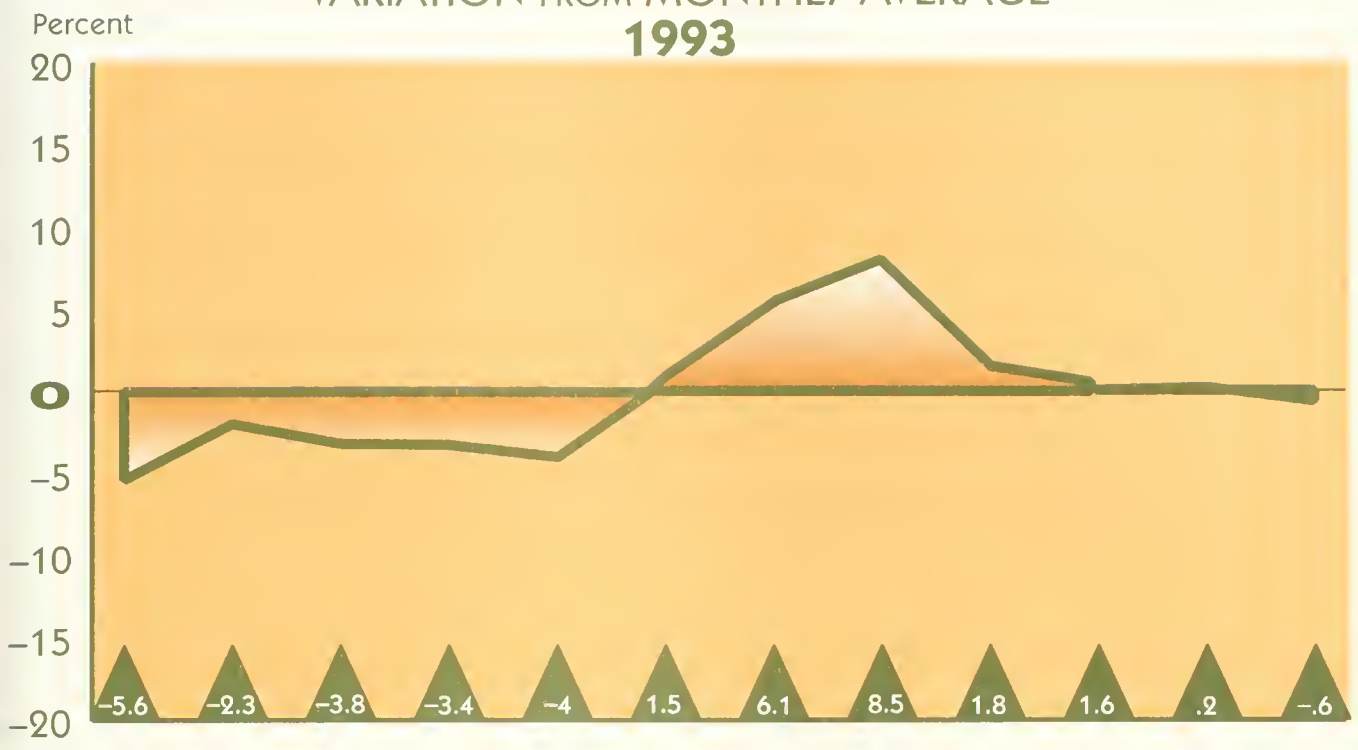

CHART 2.18

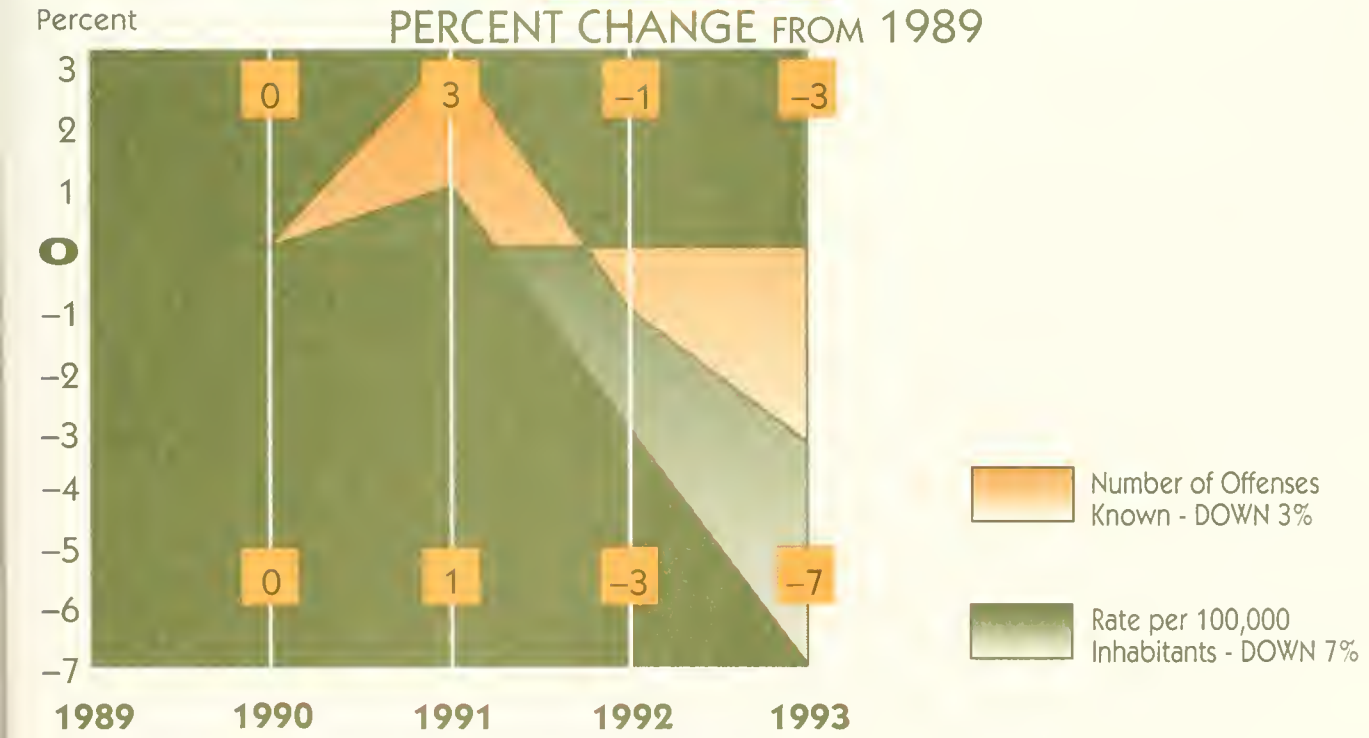
PERCENT CHANGE FROM 1989



BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	2,979,884	1,168.2
1993	2,834,808	1,099.2
Percent change	–4.9	–5.9

An estimated 2,834,808 burglaries occurred in the United States during 1993. These offenses accounted for 20 percent of the Crime Index total and 23 percent of the property crimes.

Distribution figures for the regions showed the highest burglary volume occurred in the most populous Southern States, accounting for 41 percent of the total. The Western States followed with 24 percent, the Midwestern States with 19 percent, and the Northeastern States with 16 percent.

In 1993, the greatest number of burglaries was recorded during December, while the lowest count was reported in February. (See Table 2.26.)

Table 2.26—Burglary by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	8.8	8.8	8.1	8.6	8.3
February	7.3	7.5	7.3	7.7	6.9
March	8.2	8.1	8.1	8.2	8.2
April	7.7	7.8	7.9	7.8	7.7
May	8.4	8.1	8.3	8.2	8.0
June	8.3	7.9	8.2	8.1	8.4
July	9.2	8.9	9.2	9.0	9.0
August	9.3	9.0	9.2	9.0	9.1
September	8.6	8.3	8.6	8.4	8.5
October	8.5	8.5	8.6	8.3	8.4
November	8.1	8.3	8.0	8.2	8.1
December	7.8	8.7	8.6	8.3	9.3

Nationwide, the burglary volume dropped 5 percent in 1993 from the 1992 total. By population group, decreases were registered in all city groupings; the largest decrease was in cities with populations of 250,000 and over, which showed a 7-percent decline. (See Table 12.)

Geographically, all four regions of the United States reported decreases in burglary volumes during 1993 as compared to 1992. Both the Northeastern States and the Midwestern States experienced 6-percent declines. The Southern States showed a 5-percent decrease; and the Western States reported the smallest change, a 2-percent decline.

Longer term national trends show burglary down 11 percent from the 1989 volume and 5 percent below the 1984 level.

Rate

A burglary rate of 1,099 per 100,000 inhabitants was registered nationwide in 1993. The rate was 6 percent lower than in 1992 and 13 percent below the 1984 rate. In 1993, for every 100,000 in population, the rate was 1,182 in the metropolitan areas, 993 in the cities outside metropolitan areas, and 633 in the rural counties.

Regionally, the burglary rate was 1,286 in the Southern States, 1,221 in the Western States, 900 in the Midwestern States, and 878 in the Northeastern States. A comparison of 1992 and 1993 rates showed decreases of 7 percent in the South and Midwest, 6 percent in the Northeast, and 4 percent in the West.

Nature

Two of every 3 burglaries in 1993 were residential in nature. Sixty-eight percent of all burglaries involved forcible entry, 24 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported were evenly divided between day and night.

Burglary victims suffered losses estimated at $3.4 billion in 1993, and the average dollar loss per burglary was $1,185. The average loss for residential offenses was $1,189, while for nonresidential property, it was $1,179. Compared to 1992, the 1993 average loss for both residential and nonresidential property declined. Both residential and nonresidential burglary volumes also showed declines from 1992 to 1993, 4 and 6 percent, respectively. (See Table 23.)

Law Enforcement Response

Nationwide in 1993, a 13-percent clearance rate was recorded for burglaries brought to the attention of law enforcement agencies across the country. Geographically, in the South, the clearance rate was 15 percent; in the Northeast, 13 percent; in the West, 12 percent; and in the Midwest, 11 percent.

Rural county law enforcement agencies cleared 16 percent of the burglaries in their jurisdictions. Agencies in suburban counties cleared 14 percent, and those in cities, 13 percent.

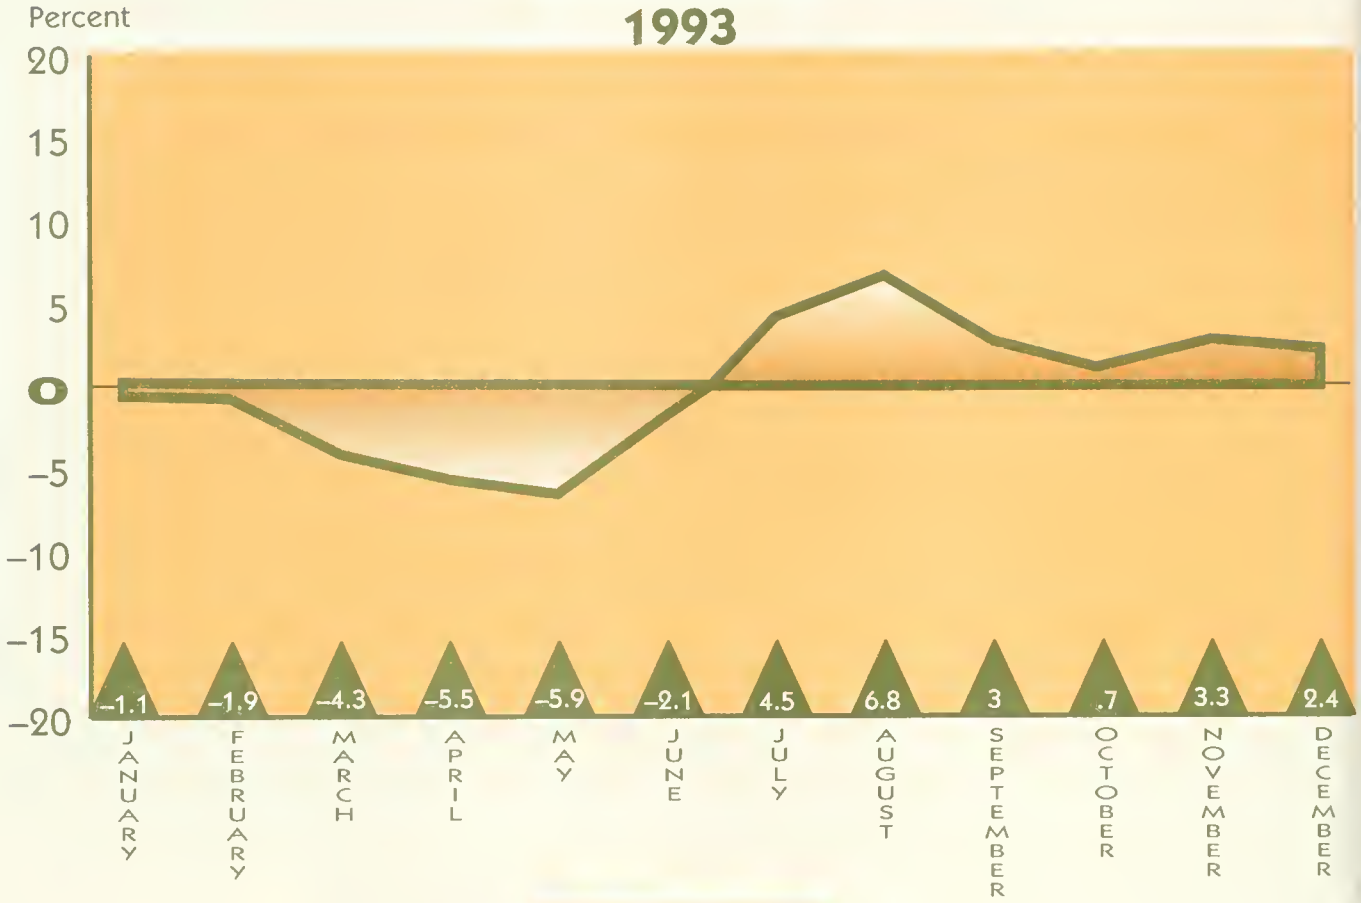

CHART 2.20

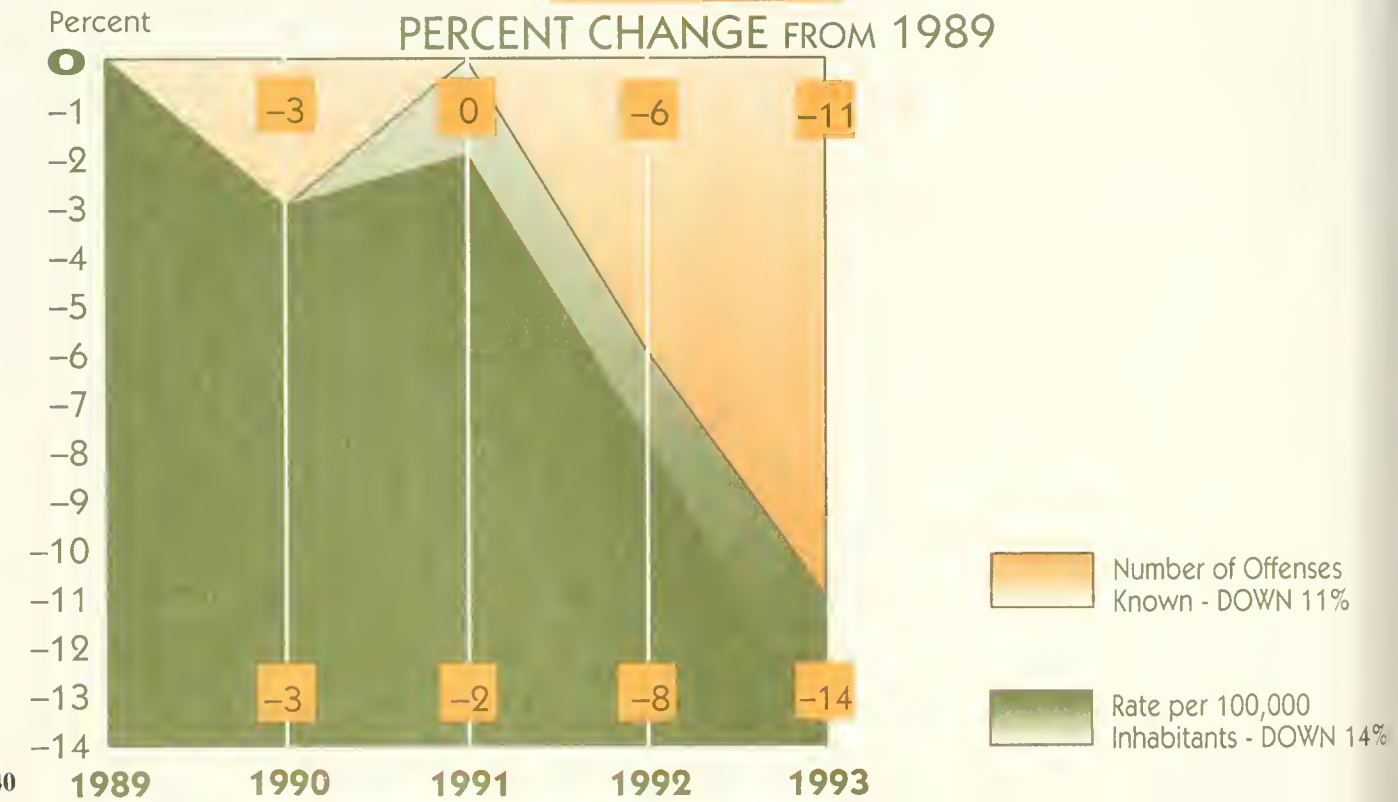
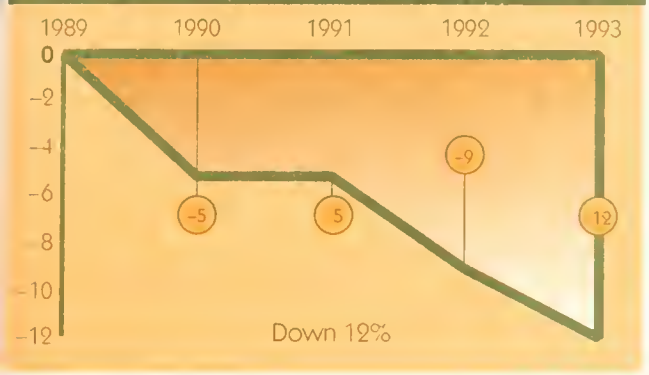
PERCENT CHANGE FROM 1989



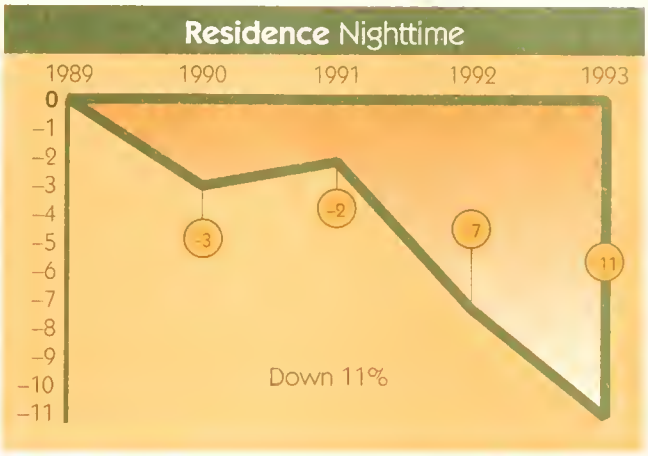
BURGLARY Percent Change from 1989

CHART 2.21

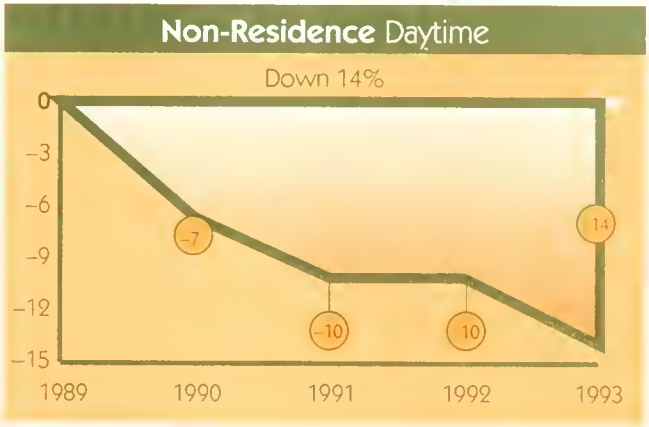
Residence Daytime



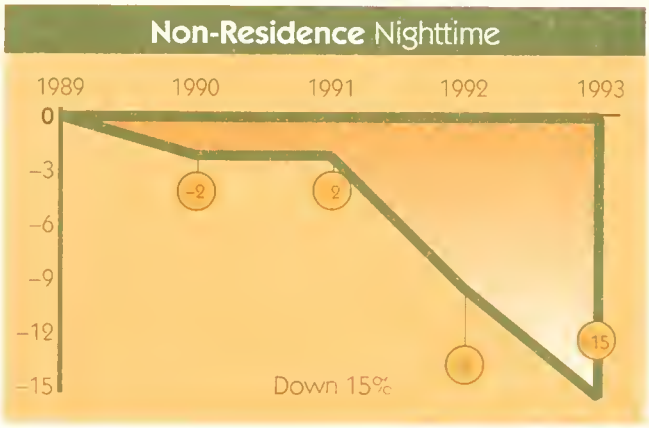
Residence Nighttime



Non-Residence Daytime



Non-Residence Nighttime



Adults were involved in 79 percent of all burglary offenses cleared; the remaining 21 percent involved only young people under 18 years of age. Persons under age 18 accounted for 20 percent of the burglary clearances in cities, and 22 percent of those in both rural and suburban counties. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 27 percent of the clearances. (See Table 28.)

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary, for which an estimated 402,700 arrests were made in 1993. Arrest trends between 1992 and 1993 show total burglary arrests were down 5 percent. Arrests of persons under 18 years of age decreased 4 percent, while those of adults were down 6 percent. For the same 2-year time period, total burglary arrest trends showed decreases of 6 percent in cities and suburban counties, and less than a 1-percent increase in the rural counties.

Ninety percent of the burglary arrestees during 1993 were males, and 63 percent of the total were under 25 years of age. Among all burglary arrestees, whites accounted for 67 percent, blacks for 31 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	7,915,199	3,103.0
1993	7,820,909	3,032.4
Percent change	–1.2	–2.3

Larceny-theft, estimated at 7.8 million offenses during 1993, comprised 55 percent of the Crime Index total and 64 percent of the property crimes. Similar to the experience in previous years, larceny-thefts were recorded most often during August and least frequently in February.

Table 2.27 – Larceny-Theft by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	8.0	8.2	7.8	8.2	7.7
February	7.2	7.4	7.5	7.8	6.8
March	8.2	8.2	8.2	8.3	8.0
April	8.0	7.9	8.1	8.1	8.0
May	8.6	8.3	8.4	8.2	8.2
June	8.7	8.3	8.5	8.5	8.7
July	9.2	8.9	9.2	9.1	9.2
August	9.5	9.1	9.3	9.1	9.3
September	8.3	8.2	8.3	8.4	8.3
October	8.6	8.7	8.7	8.6	8.6
November	8.0	8.1	7.9	7.9	8.0
December	7.7	8.4	8.2	8.0	9.1

When viewed geographically, the Southern States, the most populous region, recorded 38 percent of the larceny-theft total. The Western States recorded 24 percent; the Midwestern States, 22 percent; and the Northeastern States, 15 percent. (See Table 3.)

Compared to 1992, the 1993 volume of larceny-thefts decreased 1 percent in the Nation and in rural and suburban counties and 2 percent in all cities collectively. Similar to the national experience, city population groups ranging from 50,000 to 999,999 inhabitants experienced 1-percent declines in their 1993 larceny volumes; the remaining population groups recorded 2-percent decreases.

Regionally, larceny volumes dropped in the Northeast, 3 percent; in the Midwest, 2 percent; and in the West, 1 percent. The number of larceny-thefts in the South showed no change.

The 5- and 10-year national trends indicated larceny was down 1 percent when compared to the 1989 total but up 19 percent above the 1984 level.

Rate

The 1993 larceny-theft rate was 3,032 per 100,000 U.S. inhabitants. The rate was 2 percent lower than in 1992 and 4 percent under the 1989 level. When compared to 1984, the rate showed an increase of 9 percent. The 1993 rate was 3,289 per 100,000 inhabitants of metropolitan areas; 3,582 per 100,000 population in cities outside metropolitan areas; and 1,006 per 100,000 people in the rural counties. (See Tables 1 and 2.)

For all regions, the larceny-theft rate per 100,000 inhabitants declined from 1992 levels. The rate in the Northeast was 2,358, down 4 percent; the rates of 3,360 in the West and 2,850 in the Midwest dropped 3 percent; and the South's rate of 3,339 was down 1 percent. (See Table 4.)

Nature

During 1993, the average value of property stolen due to larceny-theft was $504, up from $483 in 1992. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $3.9 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 23 percent of the thefts reported to law enforcement in 1993 ranged from $50 to $200, while in 37 percent, they were over $200.

Losses of goods and property reported stolen as a result of pocket-picking averaged $411; purse-snatching, $341; and shoplifting, $109. Thefts from buildings resulted in an average loss of $831; from motor vehicles, $531; and from coin-operated machines, $208. The average value loss due to thefts of motor vehicle accessories was $303 and for thefts of bicycles, $241. (See Table 23.)

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies – 37 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 15 percent; thefts from buildings, 13 percent; and bicycle thefts, 6 percent. The remainder was distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. Table 2.28 presents the distribution of larceny-theft by type and geographic region.

Table 2.28 – Larceny Analysis by Region, 1993
[Percent distribution]

	United States Total	Northeastern States	Midwestern States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0

LARCENY-THEFT

Percent Distribution by Type of Theft

1993

Law Enforcement Response

A 20-percent larceny-theft clearance rate was recorded nationally and in cities collectively during 1993. The highest rate, 25 percent, was reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Suburban and rural counties recorded 17-percent and 18-percent clearance rates, respectively.

Geographically, law enforcement agencies in the Western Region cleared 21 percent of the larceny offenses brought to their attention, while the Midwestern Region recorded a clearance rate of 20 percent. The Northeastern and Southern Regions each recorded clearance rates of 19 percent. (See Table 26.)

Twenty-four percent of the larceny-theft clearances nationally and in cities involved only offenders under 18 years of age. Twenty-five percent of those in suburban counties and 20 percent of those in rural counties were accounted for by persons in this age group.

Between 1992 and 1993, the total number of persons arrested for larceny dropped 3 percent. By gender, arrests for males and females declined 4 and 1 percent, respectively. During this same period, adult arrests were down 4 percent, and those of persons under 18 years of age, down 1 percent.

Considering a longer timeframe, larceny-theft arrests declined 3 percent for the 5-year period, 1989-1993. Arrests of adults were down 7 percent, and those of juveniles, up 5 percent. During this 5-year timespan, female arrests rose 3 percent, while male arrests declined 6 percent.

Larceny-theft not only comprised the largest portion of Crime Index offenses reported to law enforcement, but this offense also accounted for 52 percent of the arrests for Index crimes and 70 percent of those for property crimes in 1993. Forty-four percent of the larceny arrests were of persons under 21 years of age, and 31 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1993, comprised 33 percent of all larceny-theft arrestees.

Whites accounted for 65 percent of the total larceny-theft arrestees, blacks for 33 percent, and all other races for the remainder.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1992	1,610,834	631.5
1993	1,561,047	605.3
Percent change	–3.1	–4.1

An estimated total of 1,561,047 thefts of motor vehicles occurred in the United States during 1993. These offenses comprised 13 percent of all property crimes. The regional distribution of motor vehicle thefts showed 32 percent of the volume was in the Southern States, 29 percent in the Western States, 22 percent in the Northeastern States, and 18 percent in the Midwestern States.

The 1993 monthly figures show that the greatest numbers of motor vehicle thefts were recorded during the months of July and August, while the lowest count was in February.

Table 2.29—Motor Vehicle Theft by Month, 1989-1993
[Percent distribution]

Months	1989	1990	1991	1992	1993
January	8.3	8.5	8.3	8.8	8.5
February	7.3	7.6	7.5	7.9	7.3
March	8.1	8.4	8.2	8.2	8.2
April	7.5	7.9	7.8	7.8	7.8
May	8.0	8.1	8.1	8.1	7.9
June	8.2	8.1	8.2	8.2	8.4
July	8.8	8.8	8.7	8.8	8.9
August	9.0	8.8	8.9	8.9	8.9
September	8.5	8.4	8.3	8.2	8.4
October	9.0	8.8	8.7	8.6	8.6
November	8.7	8.3	8.5	8.3	8.3
December	8.5	8.4	8.8	8.2	8.8

The number of motor vehicle thefts nationally fell 3 percent from 1992 to 1993. The largest decline was experienced in cities with populations of 1 million or more, 8 percent. During the same period, increases occurred in the suburban counties, 1 percent, and the rural counties, 2 percent.

Geographically, three regions experienced motor vehicle theft decreases, while the Western Region showed a 1-percent increase. (See Table 4.)

The accompanying chart shows that the volume of motor vehicle thefts in 1993 remained virtually unchanged when compared to the 1989 volume.

Rate

The 1993 national motor vehicle theft rate—605 per 100,000 people—was 4 percent lower than in 1992 and 1989. The 1993 rate was 38 percent above the 1984 rate.

For every 100,000 inhabitants living in MSAs, there were 721 motor vehicle thefts reported in 1993. The rate in cities outside metropolitan areas was 224 and in rural counties, 110. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1993 motor vehicle theft rate was 1,509. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 240 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 794 per 100,000 people in the Western States to 454 in the Midwestern States. The Northeastern States' rate was 664 and the Southern States' rate, 556. All regions registered rate decreases from 1992 to 1993. (See Table 4.)

An estimated average of 1 of every 126 registered motor vehicles was stolen nationwide during 1993. Regionally, this rate was greatest in the Northeast and West where 1 of every 98 motor vehicles registered was stolen. The other two regions reported lesser rates—1 per 141 in the South and 1 per 178 in the Midwest.

Nature

During 1993, the estimated value of motor vehicles stolen nationwide was nearly $7.5 billion. At the time of theft, the average value per vehicle stolen was $4,808. The recovery percentage for the value of vehicles stolen was higher than for any other property type. Relating the value of vehicles stolen to the value of those recovered resulted in a 62-percent recovery rate for 1993.

Seventy-nine percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

Table 2.30—Motor Vehicle Theft, 1993
[Percent distribution by region]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Total[1]	100.0	79.2	15.4	5.5
Northeastern States	100.0	92.3	4.6	3.2
Midwestern States	100.0	82.1	11.8	6.1
Southern States	100.0	75.2	18.0	6.8
Western States	100.0	72.5	22.0	5.5

[1]Because of rounding, percentages may not add to totals.

MOTOR VEHICLE THEFT

CHART 2.26

VARIATION FROM MONTHLY AVERAGE

1993

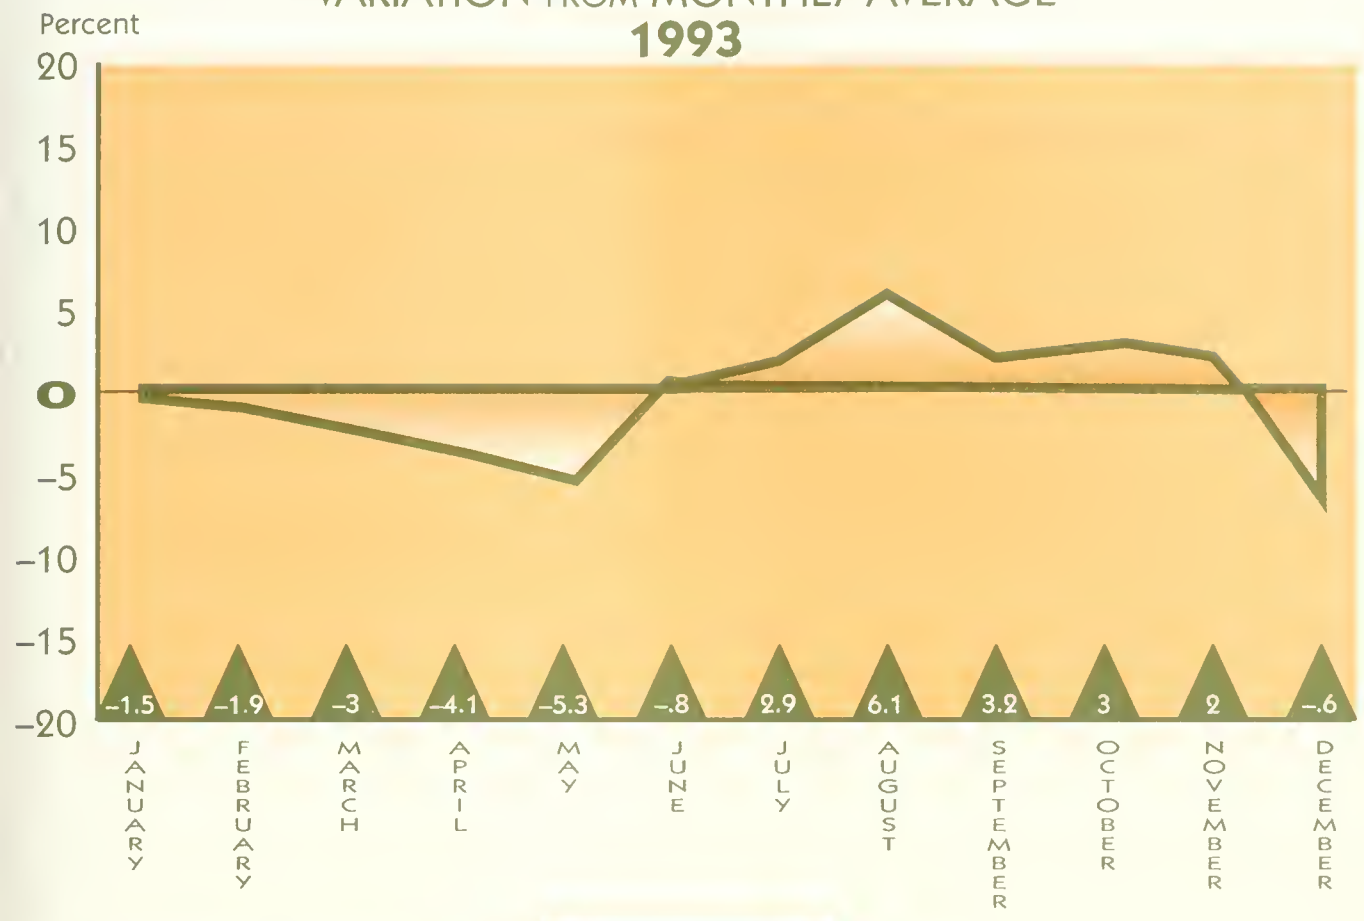

CHART 2.27

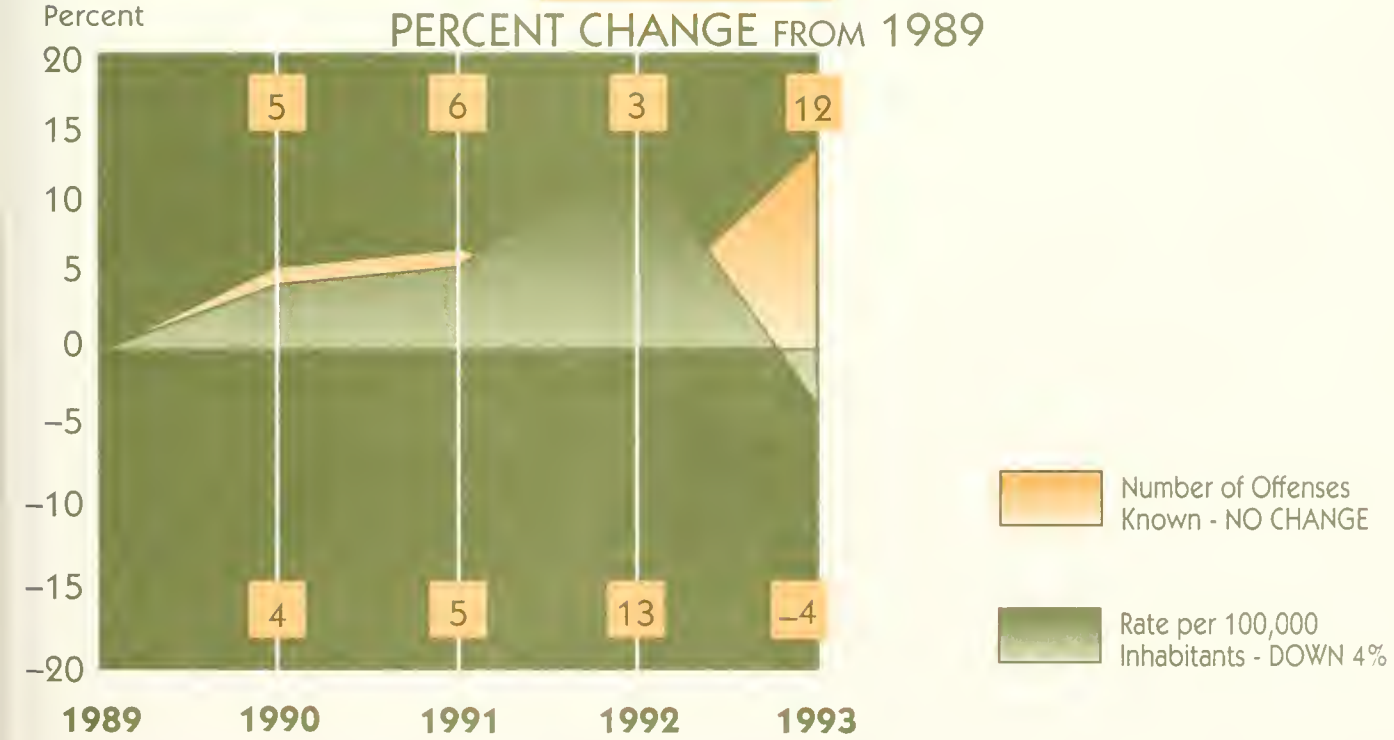
PERCENT CHANGE FROM 1989



Law Enforcement Response

Law enforcement agencies nationwide recorded a 14-percent motor vehicle theft clearance rate for 1993. Those in cities cleared 13 percent; those in suburban counties cleared 16 percent; and rural county agencies cleared 33 percent.

Regional clearance percentages for motor vehicle theft were 17 percent in the Southern States, 15 percent in the Midwestern States, 12 percent in the Western States, and 10 percent in the Northeastern States.

Persons in the under-18 age group accounted for 25 percent of the motor vehicle thefts cleared both nationally and in cities. They comprised 23 percent of the clearances in the suburban counties and 21 percent of those in the rural counties.

During 1993, law enforcement agencies nationwide made an estimated 195,900 arrests for motor vehicle theft. Males accounted for 88 percent of those arrested. Fifty-seven percent were white, 40 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1993, 61 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 45 percent of the total. Between 1992 and 1993, overall arrests of persons under age 18 were down 3 percent. Within this age range, arrests of males decreased 4 percent, while those of females were up 8 percent.

Total motor vehicle theft arrests were down 3 percent in 1993 from the previous year. For longer timeframes, total vehicle theft arrests in 1993 were 12 percent lower than in 1989 but 62 percent above the 1984 level.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

A total of 95,764 arson offenses was reported by 11,860 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1993. Of these reporting agencies, 11,743 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 12 through 15 and arson clearances in Tables 25 through 28. Since only 9,146 agencies, covering 74 percent of the United States population, submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

The number of arson offenses reported nationally and overall in the Nation's cities decreased 5 percent in 1993 as compared to the 1992 total. Changes in counts for the Nation's cities ranged from a 1-percent increase in cities with populations between 500,000 and 999,999 to an 11-percent decline in those with populations of 1,000,000 or more. The rural and suburban counties registered declines of 6 and 8 percent, respectively. (See Table 12.)

Geographically, arson decreased 10 percent in the Northeast, 7 percent in the West, 6 percent in the Midwest, and 1 percent in the South.

By property type nationally, the number of arsons of mobile property and structures declined 7 percent. Those of all other property increased 4 percent. (See Table 15.)

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures. It is expected that year-to-year statistical comparability will improve as collection continues.

Table 2.31—Arson Rate, Population Group, 1993
[9,146 agencies; 1993 estimated population 191,161,033; rate per 100,000 inhabitants]

Group	Rate
Total	45.9
Total cities	53.7
Group I (cities 250,000 and over)	85.5
(cities 1,000,000 and over)	89.0
(cities 500,000 to 999,999)	77.1
(cities 250,000 to 499,999)	87.1
Group II (cities 100,000 to 249,999)	63.1
Group III (cities 50,000 to 99,999)	40.5
Group IV (cities 25,000 to 49,999)	33.8
Group V (cities 10,000 to 24,999)	26.3
Group VI (cities under 10,000)	28.4
Suburban counties	33.9
Rural counties	18.8
Suburban area	31.3

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1993 rates are shown in Table 2.31.

The rates ranged from 89 per 100,000 inhabitants in cities with populations over 1 million to 19 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 34 and 54 per 100,000 inhabitants, respectively. Overall, the 1993 national arson rate was 46 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 55 offenses per 100,000 population. Following were the Midwestern States with a rate of 47 per 100,000, the Northeastern States with 44 per 100,000, and the Southern States with 39 per 100,000.

Nature

As in previous years, structures were the most frequent targets of arsonists in 1993 and comprised 52 percent of the reported incidents. Twenty-six percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 22 percent.

Table 2.32—Arson, Type of Property, 1993
[11,743 agencies; 1993 estimated population 201,989,000]

Property classification	Number of offenses	Percent distribution[1]
Total	82,348	100.0
Total structure	42,867	52.1
Single occupancy residential	17,795	21.6
Other residential	7,516	9.1
Storage	3,753	4.6
Industrial/manufacturing	681	.8
Other commercial	4,968	6.0
Community/public	5,049	6.1
Other structure	3,105	3.8
Total mobile	21,617	26.3
Motor vehicles	20,094	24.4
Other mobile	1,523	1.8
Other	17,864	21.7

[1]Because of rounding, percentages may not add to totals.

Residential property was involved in 59 percent of the structural arsons during the year, with 42 percent of such offenses directed at single-family dwellings. Nineteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Table 2.33—Arson, Structures Not in Use, 1993
[11,743 agencies; 1993 estimated population 201,989,000]

Type of structure	Number of offenses	Percent not in use
Total	42,867	18.7
Single occupancy residential	17,795	23.2
Other residential	7,516	13.3
Storage	3,753	23.8
Industrial/manufacturing	681	22.9
Other commercial	4,968	13.1
Community/public	5,049	8.3
Other structure	3,105	25.4

The monetary value of property damaged due to reported arsons averaged $16,616 per incident in 1993. The overall average for all types of structures was $16,468. Mobile properties averaged $4,107 per incident, and other targets averaged $32,114.

The value of other targets was largely influenced by arsons in forested areas of California. While the fires spread and destroyed various properties, their points of origin were in the forest.

Table 2.34—Arson, Monetary Value of Property Damaged, 1993
[11,743 agencies; 1993 estimated population 201,989,000]

Property classification	Number of offenses	Average damage

Motor vehicles	20,094	3,729
Other mobile	1,523	9,094
Other	17,864	32,114

Law Enforcement Response

The national 1993 arson clearance rate was 15 percent. Agencies in cities with fewer than 10,000 inhabitants showed the highest rate, clearing 24 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 21 percent; those in suburban counties, 19 percent; and in cities, 14 percent. (See Table 25.)

Regionally, the Southern States recorded a clearance rate of 20 percent; the Western States, 15 percent; and the Northeastern and Midwestern States, 13 and 12 percent, respectively.

Forty-four percent of all 1993 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Juveniles accounted for 42 percent of structural arson clearances, 26 percent of the clearances for arsons of mobile property, and 58 percent of those of all other property.

Table 2.35—Arson Offenses Cleared by Arrest,[1] 1993
[11,743 agencies[2]; 1993 estimated population 201,989,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	82,348	17.7

Other mobile	1,523	16.8
Other	17,864	18.1

[1]Includes offenses cleared by exceptional means.
[2]To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 46 percent of the city, 41 percent of the suburban county arson clearances, and 25 percent of those in the rural counties.

Tables 2.35 and 2.36 show clearance data only for those 11,743 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (33 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (8 percent) was registered for motor vehicles.

Table 2.36—Arson Offenses Cleared by Arrest[1] of Persons under 18 Years of Age, 1993
[11,743 agencies[2]; 1993 estimated population 201,989,000]

Property classification	Total clearances	Percent under 18
Total	14,610	44.0
Total structure	9,465	42.6

Other mobile	256	39.5
Other	3,239	58.4

[1]Includes offenses cleared by exceptional means.
[2]To be included in this table, it was necessary that arson clearances be reported by property classification.

The estimated number of arrests for arson during 1993 totaled 19,400. Forty-nine percent of the arrestees were under 18 years of age and 66 percent were under 25. Males comprised 85 percent of all arson arrestees. Seventy-five percent of those arrested were white, 24 percent were black, and the remainder were of other races.

Trends for 1992 versus 1993 show national arson arrests decreased 1 percent and in suburban counties, 6 percent. An increase of 1 percent occurred in the Nation's cities, and no change was shown in rural counties.

Nationwide, arrests of juveniles were up 2 percent, while adult arrests showed a 3-percent decrease from 1992 to 1993. During the same period, male arrests for arson declined 2 percent and female arrests rose 8 percent. The 1993 arson arrest total for all ages was 8 percent higher than the 1989 level and 2 percent above the 1984 level.

Crime Index Tabulations

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; information on the types of weapons used; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page *iv* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past two decades are set forth in Table 1, "Index of Crime, United States, 1974-1993."

Table 2, "Index of Crime, United States, 1993," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas. See Appendix III for the definitions of these community types.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1993," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1993, they also represented the greatest regional population.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1993 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 8 through 11. Two-year arson trends are shown in Tables 12 through 15.

[1]Populations are Bureau of the Census provisional estimates as of July 1, except 1980 and 1990 which are the decennial census counts.

[2]Because of rounding, the offenses may not add to totals.

[3]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny – theft, and motor vehicle theft. Data are not included for the property crime of arson.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

All rates were calculated on the offenses before rounding.

[1]Populations are Bureau of the Census provisional estimates as of July 1 and are subject to change.

[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

[5]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and Minnesota Department of Public Safety were not in accordance with national UCR guidelines. The 1993 forcible rape totals for Michigan and Minnesota were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation," page 376 for details. No percent changes are shown for Michigan and Minnesota for the forcible rape, violent crime, and Crime Index total categories because the figures are not comparable.

[6]Includes offenses reported by the Zoological Police.

[7]The 1993 Bureau of Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided. Data for Puerto Rico are not included in totals.

Offense totals are based on all reporting agencies and estimates for unreported areas.

[1]Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes offenses reported by the Zoological Police.

[5]Complete data were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

[6]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines. The 1993 forcible rape totals for Michigan and Minnesota were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state totals are shown. See "Offense Estimation," page 376 for details.

[7]The 1993 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided.

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 8.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, violent crime, and Crime Index total categories. However, several Minnesota law enforcement agencies verified and/or adjusted their forcible rape figures to comply with national UCR guidelines and are shown in this table.

[5]Due to reporting changes figures are not comparable to previous years.

[6]The 1993 Bureau of the Census population estimates for the individual Puerto Rico M.S.A.'s were not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 7. – Offense Analysis, United States, 1989-1993

Classification	1989	1990	1991	1992	1993

[1]Due to reporting changes, aggravated assault figures are not comparable to previous years.

[2]Complete data for 1993 were not available for the states of Illinois and Kansas. See "Offense Estimation," page 376 for details. Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police under the summary reporting system were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

[3]Due to reporting changes, figures are not comparable to previous years.

[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total and Modified Crime Index total categories. However, some Minnesota law enforcement agencies verified and/or adjusted their forcible rape figures to comply with national UCR guidelines and are shown in this table.

[5]Twelve months of useable data were not received for any Montana cities over 10,000 in population.

Table 9. — Number of Offenses Known to the Police, Universities and Colleges, 1993

*Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

University/College	Student enrollment[1]	Violent[2] crime total	Violent crime				Property[3] crime total	Property crime			
			Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault		Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]The student enrollment figures provided by the United States Department of Education are for 1992, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix I for details.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Student enrollment figures were not available.

[5]1993 figures are not comparable to prior years.

[6]Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. "See Offense Estimation," page 376 for details.

[7]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 10.—Number of Offenses Known to the Police, Suburban Counties, 1993

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details. Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police under the summary reporting system were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

[2]Forcible rape figures furnished by the state-level UCR Program administered by the Michigan State Police and Minnesota Department of Public Safety were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and the Modified Crime Index total categories.

[3]1993 figures are not comparable to prior years.

Table 11.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1993

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[1]Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime figures be estimated. See "Offense Estimation," page 376 for details.

[2]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.

[3]1993 figures are not comparable to prior years.

Table 12.—Crime Trends, Offenses Known to the Police, Population Group, 1992-1993

[1993 estimated population]

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arson by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdowns.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 13.—Crime Trends, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1992-1993

[1]Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

[2]The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arson by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses.

[2]Less than one-tenth of one percent.

[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376, for details.

Table 16.—Crime Rates, Offenses Known to the Police, Population Group, 1993

[1993 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by Michigan State Police and Minnesota Department of Public Safety were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 17.-Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1993

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by Michigan State Police and Minnesota Department of Public Safety were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 19. – Crime Rates, Offenses Known Breakdown, Population Group, 1993

[1993 estimated population. Rate: number of crimes per 100,000 inhabitants]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[1]		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
TOTAL ALL AGENCIES:																			
10,917 agencies;

SECTION III

Crime Index Offenses Cleared

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Clearances recorded in 1993 may be for offenses which occurred in prior years. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies nationwide recorded a 21-percent Crime Index clearance rate for 1993. Collectively, 44 percent of violent crimes were cleared. Among the violent offenses, the rates were 66 percent for murder, 53 percent for forcible rape, 24 percent for robbery, and 56 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as these offenses are often given more intensive investigative efforts and the victims and/or witnesses can frequently identify the perpetrators.

The overall property crime clearance rate was 17 percent. Thirteen percent of the burglaries, 20 percent of the larceny-thefts, 14 percent of motor vehicle thefts, and 15 percent of arsons were cleared during the year.

When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

The highest total Crime Index clearance rate geographically was registered in the Southern States, with 22 percent. The Western States registered a 21-percent clearance rate, and the Midwestern and Northeastern States each recorded a 20-percent clearance rate. For violent crime overall, the highest clearance rate, 48 percent, was also recorded in the South. In the West, the rate was 46 percent, in the Northeast, 40 percent, and in the Midwest, 39 percent. Property crime clearance rates were 18 percent in the South and West, 17 percent in the Midwest, and 16 percent in the Northeast.

By community type, city law enforcement agencies showed clearances for 21 percent of the Crime Index offenses brought to their attention. Those in suburban counties cleared 20 percent, and those in rural counties, 23 percent. Among the population groups, cities with 10,000 to 24,999 inhabitants registered the highest total Crime Index clearance rate, 26 percent. The highest violent crime clearance rate was recorded in the rural counties with 61 percent. Like the Crime Index clearance rate, the property crime rate was highest for cities with populations from 10,000 to 24,999, 23 percent. (See Table 25.)

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest may have been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) account for 26 percent of the United States population, according to 1993 Bureau of the Census estimates.

Twenty-one percent of the Crime Index offenses cleared by law enforcement during 1993 involved only young people under age 18. Persons in this age group accounted for 13 percent of the violent crime clearances and 23 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (9 percent), while the highest percentage was shown for arson (44 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under 18 age group—23 percent. Juveniles alone were the offenders in 21 percent of the clearances in the Western States, 20 percent of those in the Southern States, and 19 percent of those in the Northeastern States.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by the Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 26. – Offenses Known and Percent Cleared by Arrest[1], Geographic Region and Division, 1993

[1993 estimated population]

Geographic region/ division	Crime Index total	Modified Crime Index total[2]	Violent crime[3]	Property crime[4]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[2]

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

Table 27.—Offenses Known Breakdown and Percent Cleared by Arrest[1], Population Group, 1993

[1993 estimated population]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[2]

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses.

[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than those used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Programs administered by Michigan State Police and the Minnesota Department of Public Safety were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1993 were not available for the states of Illinois and Kansas; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

SECTION IV

Persons Arrested

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 14 million arrests in 1993 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for driving under the influence and larceny-theft, both 1.5 million; and simple assault and drug abuse violations, each 1.1 million. (See Table 29.)

When the overall arrest volume was related to the total United States population, the rate was 5,490 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest rate, 7,103, while those with populations from 25,000 to 49,999 recorded the lowest rate, 5,255. (See Table 31.) For suburban county agencies overall, the arrest rate was 4,010, and for rural county law enforcement, it was 3,989 per 100,000 inhabitants. Regionally, the arrest rates per 100,000 population ranged from 5,020 in the Northeast to 5,773 in the South. (See Table 30.)

Due to NIBRS conversion efforts, no arrest data for Kansas law enforcement agencies were available for 1993. Therefore, tables showing the age, sex, or race of persons arrested contain no Kansas data. Arrest totals were, however, estimated for inclusion in Table 29, "Total Estimated Arrests, United States, 1993."

Arrest Trends

The national total number of arrests for all offenses except traffic violations declined 1 percent in 1993 as compared to the 1992 volume. Overall Crime Index arrests fell 2 percent, and those for property crimes declined 3 percent. An increase of 1 percent was reported for violent crime arrests. During the same time period, adult arrests for all offenses declined 3 percent, while those of juveniles were up 5 percent. (See Table 36.) Violent crime arrests were down less than 1 percent for adults but up 6 percent for juveniles. (See Table 36.)

Two-year arrest trends for rural county agencies showed a 2-percent increase, 1993 over 1992, while a 2-percent decrease was recorded for city and suburban county agencies. (See Tables 44, 50, and 56.)

For the 5-year period, 1989 versus 1993, total arrests increased less than 1 percent and juvenile arrests were up 13 percent, while adult arrests declined 2 percent. (See Table 34.) Total Crime Index arrests declined 1 percent, and those of adults, 5 percent; but those of juveniles rose 7 percent. During the same years, 1989-1993, total violent crime arrests increased 13 percent, and property crime arrests fell 6 percent.

For the decade, 1984-1993, arrests for all offenses were up 18 percent; Crime Index arrests, 21 percent; violent crime arrests, 50 percent; and property crime arrests, 13 percent. (See Table 32.)

The 1993 drug abuse violation arrest total was up 4 percent from the 1992 level, 14 percent lower than in 1989, and 56 percent higher than in 1984. The following table shows the types of drugs involved in violations resulting in arrests during 1993 by geographic region.

Table 4.1—Arrests for Drug Abuse Violations, 1993
[Percent distribution]

	United States total	Northeastern States	Midwestern States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Sale/manufacture:	29.7	40.8	29.4	26.5	24.7
Heroin or cocaine and their derivatives	19.2	33.1	10.2	18.0	13.3
Marijuana	6.2	6.0	8.2	5.9	5.9
Synthetic or manufactured drugs	.6	.6	.5	.7	.4
Other dangerous nonnarcotic drugs	3.7	1.1	10.4	1.9	5.1
Possession:	70.3	59.2	70.6	73.5	75.3
Heroin or cocaine and their derivatives	31.1	31.7	20.1	32.4	33.1
Marijuana	27.6	24.4	38.0	35.0	18.8
Synthetic or manufactured drugs	1.2	.9	1.0	1.8	.9
Other dangerous nonnarcotic drugs	10.4	2.2	11.5	4.3	22.4

[1]Because of rounding, percentages may not add to totals.

Age

Six percent of all persons arrested nationally in 1993 were under the age of 15; 17 percent were under 18; 30 percent were under 21; and 45 percent were under 25. Persons in the under-25 age group accounted for 46 percent of arrests in the cities, 40 percent of those in the suburban counties, and 39 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 29 percent were under the age of 18; 43 percent, under 21; and 55 percent, under 25. The under-25 age group was also responsible for 47 percent of the violent crime arrests and 58 percent of property crime arrests in 1993.

Larceny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence. (See Table 38.)

Sex

Eighty-one percent of the persons arrested in the Nation during 1993 were males. (See Table 42.) They accounted for 77 percent of Index crime arrests, 87 percent of those for violent crimes, and 74 percent of the property crime arrests. Men were most often arrested for driving under the influence, which accounted for 11 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 74 percent of arrests of women for Index crimes and 18 percent of all female arrests. Fifty-three percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 2-percent decline in total male arrests from 1992 to 1993, while female arrests were up 1 percent for the same period. (See Table 37.) Arrests of males were down 1 percent, and those of females, up 8 percent for the 5-year period from 1989 to 1993.

Race

Race distribution figures for the total number of arrests in the United States during 1993 showed 67 percent of the arrestees were white, 31 percent were black, and the remainder were of other races. (See Table 43.) Whites accounted for 61 percent of the Index crime arrests, 53 percent of the arrests for violent crimes, and 64 percent of those for property crimes.

Table 29.—Total Estimated Arrests[1], United States, 1993

Total[2]	**14,036,300**
Murder and nonnegligent manslaughter	23,400
Forcible rape	38,420
Robbery	173,620
Aggravated assault	518,670
Burglary	402,700
Larceny-theft	1,476,300
Motor vehicle theft	195,900
Arson	19,400
Violent crime[3]	754,110
Property crime[4]	2,094,300
Crime Index total[5]	2,848,400
Other assaults	1,144,900
Forgery and counterfeiting	106,900
Fraud	410,700

[1]Includes only suburban county law enforcement agencies.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5]Includes arson. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

Table 32. – Total Arrest Trends, 1984-1993

[1]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
[2]Because of rounding, the percentages may not add to total.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

[1]Does not include traffic arrests.
[2]Includes arson.
[3]Violent crime includes offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crime includes offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Drunkenness is not considered a crime in some states; therefore, the figures vary widely from state to state.
[6]Complete data for 1993 were not available for the states of Illinois and Kansas.
NOTE: Direct comparisons of arrest totals listed in this table should not be made with prior years' issues. Some Part II offenses are not considered crimes in some states; therefore figures may vary widely.

SECTION V

Homicide Patterns: Past and Present

Murder has always been regarded as the most serious of all crimes. Today, the prevailing public perception is that homicides, in general, are more vicious and senseless than ever before. In an effort to address this issue, the following study examines the changing nature of murder from 1965 to 1992.

While the Nation's homicide rate per 100,000 residents was 9.3 in 1992, the historical high actually occurred 13 years prior (10.2 in 1980). What, then, has spurred the current national debate on how to curtail murders and violent crime? Ostensively, something has changed in the constitution of murder to bring about the unparalleled level of concern and fear confronting the Nation.

A historical review of the U.S. murder rate trend reveals that after a rapid escalation from 5.1 in 1965 to 9.4 in 1973, the rate stabilized in subsequent years, ranging from 8.0 to 10.2, as shown in Chart 5.1. This study focuses on significant changes in the types of victims, arrestees, related circumstances, and weapons usage as possible contributing factors for the current trepidation associated with homicides.

Victim Profile

The most striking change in murder victimization since the 1980s is the youthfulness of the victims. Of particular note are the increases in the number of murder victims in the age groups "under 1" and "10 to 14" as indicated by Table 5.1. The number of victims in these two age groups, while remaining relatively small overall, increased 46 percent and 64 percent, respectively, from 1975 to 1992. Further, the number of victims in the "15 to 24" age group, the most murder prone, increased nearly 50 percent. These three age groups were primarily responsible for the 16-percent increase in total homicides nationwide between 1975 and 1992. The same held true for the 25-percent increase in homicides from 1985-1992.

Table 5.1

Estimated Number of Murder Victims, Selected Age Groups, United States, 1975-1992

Age	1975	1980	1985	1992
Under 1	183	222	206	268
1 to 9	516	495	514	563
10 to 14	226	233	233	370
15 to 24	4,993	6,008	4,415	7,412
25 to 49	10,207	11,729	10,112	12,073
50 and over	4,033	3,956	3,087	2,748
Unknown	351	395	414	326
Total	20,509	23,038	18,981	23,760

Conversely, the number of murder victims aged 50 and over decreased 32 percent between 1975 and 1992. As this population segment is among the Nation's fastest growing, an increase in the number of victims contained in it was expected. The decline confirms a definitive trend toward more youthful murder victims.

Victim data by race and age reveal that blacks aged 24 or younger constituted 41 percent of black murder victims during 1992, up from 29 percent in 1975. The 1992 statistic is in concert with the finding of the U.S. Department of Health and Human Services that homicide is now the leading cause of death for young black males. The corresponding percentage for whites rose only slightly from 28 percent to 31 percent, 1975 versus 1992. These data indicate that black victims are, on average, more youthful than white victims.

The gender distribution for murder victims has remained virtually unchanged from 1975 to 1992 as shown in Table 5.2. Homicide victims are predominantly male.

Table 5.2

Sex of Murder Victims, Percent Distribution, United States, 1975-1992

Year	Male	Female
1975	76%	24%
1980	77	23
1985	74	26
1992	77	23

Circumstances/Relationships

Nationally, the circumstances/relationships associated with homicides have changed significantly since the 1960s. Historically, the vast majority of murders have been between people with some type of relationship or acquaintance. During the 1990s, however, there is evidence that this is no longer the case. For example, in 1965, only 5 percent of murder circumstances were unknown, while in 1992, this figure rose to 28 percent. When addressing victim/offender relationships, murders by strangers and unknown persons represented 53 percent of the murders in the Nation during 1992. This percentage represents a historical high.

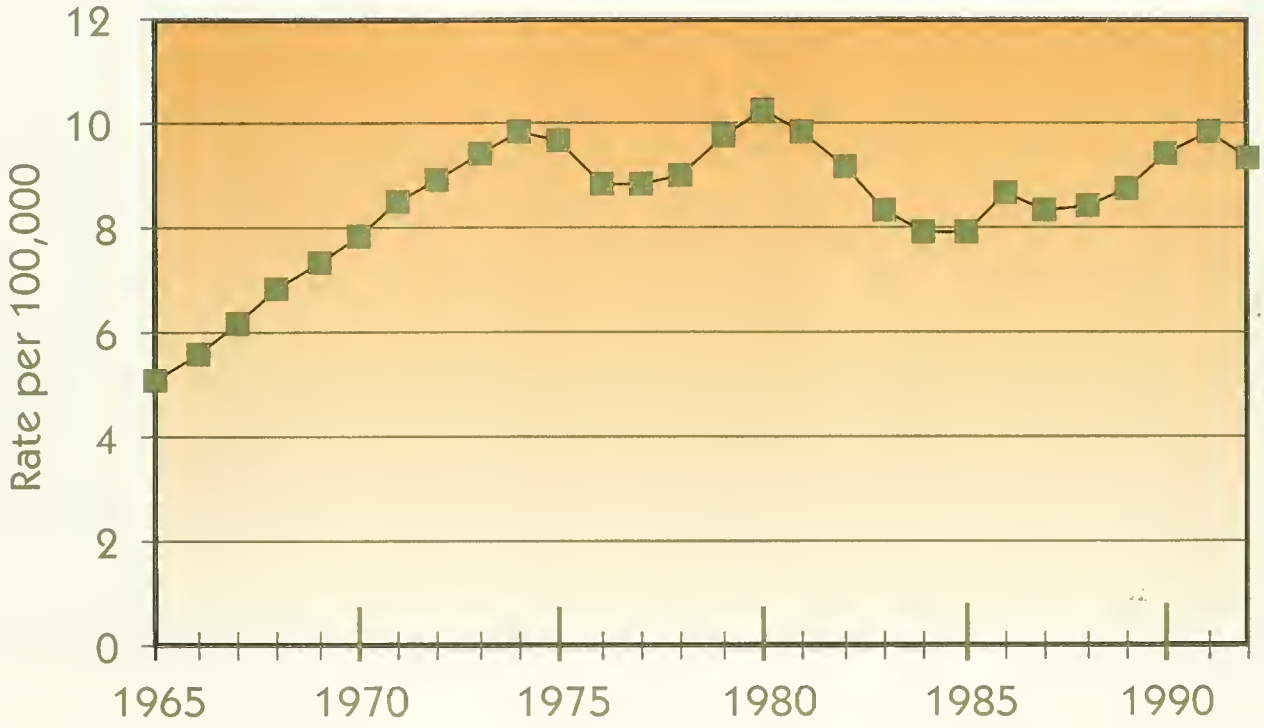
The prevalence of murder among family members as a percentage of all murders also experienced a prominent

MURDER RATES

CHART 5.1

UNITED STATES

1965 - 1992



shift. In 1965, nearly 1 out of 3 (31 percent) murder victims was killed by a person or persons within his or her family. In 1992, however, the figure fell to only 12 percent, (see Table 5.3) supporting the trend of murders becoming less family-oriented. The Nation's drug trade is widely considered to be a major contributing factor to the rise in murders whose circumstances are unknown.

Table 5.3

Estimated Number and Percent of Murder Victims Killed Within Family, United States, 1965-1992

	1965	1970	1975	1980	1985	1992
Number of Victims	3,063	4,408	5,128	3,685	3,227	2,851
Percent of Murder Total	31%	25%	25%	16%	17%	12%

From a longitudinal perspective, after peaking in the mid-1970s, felony murders and suspected felony murders have been relatively stable in spite of some minor variations as shown in Table 5.4. This trend also holds true when considering the percentage of the total these murders represent. It should be cautioned, however, that from 1985 to 1992, known felony-related murders increased 47 percent. This increase was primarily driven by a 147-percent rise in narcotics felony-related homicides.

Table 5.4

Estimated Felony-Type or Suspected Felony-Type Murders, Percent of Total, United States, 1965-1992

	1965	1970	1975	1980	1985	1992
Number of Victims	1,580	4,599	6,563	5,520	3,796	5,569
Percent of Murder Total	16%	29%	32%	24%	20%	23%

While murder has traditionally been called a crime of passion resulting from romantic triangles and lovers' quarrels, recent statistics reveal that these types of murders have been declining as a percentage of total homicides. (See Table 5.5.) In fact, the number of murder victims killed under these circumstances declined 22 percent from 1975 to 1992.

Table 5.5

Estimated Murder Victims Due to Romantic Triangles and Lovers' Quarrels, Percent of Total, United States, 1965-1992

	1965	1970	1975	1980	1985	1992
Number of Victims	996	1,126	1,497	1,244	1,177	1,164
Percent of Murder Total	10.1%	7.1%	7.3%	5.4%	6.2%	4.9%

The fastest growing murder circumstance is juvenile gang killings. It should be noted that in a juvenile gang killing the perpetrator is associated with a juvenile gang but may be of any age, i.e., an adult gang leader. The victim, whether juvenile or adult, is not necessarily associated with a gang. Prior to 1980, the number of murders in this category was well below 200 per year. As shown in Table 5.6, from 1980 to 1992, juvenile gang killings increased 371 percent. Further, 95 percent of victims of juvenile gang killings in 1992 were slain with firearms. When considering the race of the victims, 68 percent were white and 27 percent were black. Sixty-nine percent of the victims killed by juvenile gangs were age 18 and older.

Table 5.6

Estimated Juvenile Gang Killings, Percent of Total, United States, 1980-1992

	1980	1985	1992
Number of Victims	181	231	852
Percent of Murder Total	.8%	1.2%	3.6%

Homicide is one of the most intraracial crimes when considering victims and offenders. This dimension of murder has been constant throughout time. A review of homicide incidents during 1992 which involved one victim and one offender showed that 94 percent of black murder victims were killed by black offenders, and 83 percent of white murder victims were killed by white offenders.

Weapons Usage

The Nation experienced an increase in the percentage of homicides committed with guns during the period 1985 to 1992, as shown in Table 5.7. Conversely, the percentage of knives/cutting instruments used in murders has declined since 1965. The use of other types of weapons, e.g., blunt objects, poison, explosives, has been relatively stable.

Table 5.7

Murder Weapons, Percent Distribution, United States, 1965-1992

Weapon Type	1965	1970	1975	1980	1985	1992
Firearms	57%	65%	66%	62%	59%	68%
Knives	23	19	18	19	21	15
Other	20	16	16	19	20	17
Total	100%	100%	100%	100%	100%	100%

An examination of weapons used against victims of various ages showed the leading weapon used against those under the age of 5 from 1975 through 1992 was personal weapons (hands, fists, and feet). The gun category was the leading weapon type for all remaining age groups, especially the "15 to 19" age group. In 1975, 66 percent of the murders of persons in this group were attributable to guns, while in 1992 the figure rose to 85 percent. This increase supports the theory that today's high school-aged youths are exposed to an environment that includes guns.

The level of gun usage in homicides varies by type of circumstance, particularly for felonies. Table 5.8 delineates the percent of murders by firearm for selected felonies during 1992.

Table 5.8

Estimated Felony-Type Murders, Percent by Gun, United States, 1992

Felony Circumstances	Number of Murders	Percent Killed With Guns
Rape	141	17%
Robbery	2,329	67%
Burglary	215	47%
Motor Vehicle Theft	69	59%
Narcotic Drug Laws	1,360	89%

Profile of Arrestees

As with other aspects of homicide, the profile of the murder arrestee has changed somewhat since 1970. The most notable difference relates to white murder arrestees. Table 5.9 reveals that the number of whites arrested for homicide rose 67 percent from 1970 to 1992, accounting for most of the overall increase in the national murder arrest total. Moreover, the number of white juvenile murder arrestees increased 204 percent and the number of white adult murder arrestees was up 56 percent for the 23-year period as shown in Tables 5.10 and 5.11. The increase in the number of white juvenile arrestees was the largest among all racial groups by age classification (adult and juvenile).

Table 5.9

Estimated Total of Murder Arrests by Race, Percent Distribution, United States, 1970-1992

Year	Total Arrests	Arrests by Race			Percent Distribution			
		White	Black	Other	Total	White	Black	Other

1985	18,330	9,171	8,873	286	100.0	50.0	48.4	1.6
1992	22,510	9,791	12,400	319	100.0	43.5	55.1	1.4
Percent Change 1992/1970	+47.8	+67.3	+37.4	−9.1				

Table 5.10

Estimated Adult Murder Arrests by Race, Percent Distribution, United States, 1970-1992

Year	Total Arrests	Arrests by Race			Percent Distribution			
		White	Black	Other	Total	White	Black	Other
1970	13,631	5,412	7,933	286	100.0	39.7	58.2	2.1
1975	18,263	7,926	9,917	420	100.0	43.4	54.3	2.3
1980	18,176	9,124	8,779	273	100.0	50.2	48.3	1.5
1985	16,809	8,438	8,102	269	100.0	50.2	48.2	1.6
1992	19,246	8,449	10,526	271	100.0	43.9	54.7	1.4
Percent Change 1992/1970	+41.2	+56.1	+32.7	−5.2				

Adults = Arrestees 18 and over

When considering black murder arrestees, there have been significant increases for both adults and juveniles, but not at the rate experienced by their white counterparts (see Tables 5.10 and 5.11). It should be mentioned, however, that after falling to less than 50 percent of homicide arrests in 1980, blacks constituted 55 percent of the murder arrest total in 1992 (see Table 5.9).

Table 5.11

Estimated Juvenile Murder Arrests by Race, Percent Distribution, United States, 1970-1992

Year	Total Arrests	Arrests by Race			Percent Distribution			
		White	Black	Other	Total	White	Black	Other
1970	1,599	441	1,093	65	100.0	27.6	68.3	4.1
1975	1,917	822	1,064	31	100.0	42.9	55.5	1.6
1980	1,864	1,014	822	28	100.0	54.4	44.1	1.5
1985	1,521	733	771	17	100.0	48.2	50.7	1.1
1992	3,264	1,342	1,874	48	100.0	41.1	57.4	1.5
Percent Change 1992/1970	+104.1	+204.3	+72.5	−26.2				

Juveniles = Arrestees under the age of 18.

In conjunction with the youthfulness of murder victims, as earlier discussed, the average age of murder arrestees has fallen significantly since 1965 as well (see Table 5.12). The decline from 1985 to 1992 is particularly noteworthy. This latter decline tends to indicate that the surge in the number of youthful murder offenders commenced during the latter part of the 1980s.

Table 5.12

Average Age of Murder Arrestees, United States, 1965-1992

Year	Average Age of Murder Arrestees
1965	32.5
1970	30.7
1975	29.7
1980	29.3
1985	29.8
1992	27.0

Although the total number of murder arrests has risen substantially over time, this increase does not reflect the movement of the Nation's murder clearance rate. Specifically, as shown in Table 5.13, the percent of murders cleared by arrest has fallen from 91 percent in 1965 to an all-time low of 65 percent in 1992. The primary reason for this trend may be that circumstances and victim/offender relationships composing today's murders are more likely to be unknown.

Table 5.13

Murder Clearance Rates, United States, 1965-1992

	1965	1970	1975	1980	1985	1992
Number of Murders	9,880	15,860	20,510	23,040	18,980	23,760
Percent Cleared	91%	86%	78%	72%	72%	65%

Conclusions

The typical assumptions associated with homicides throughout this century must be reevaluated in view of the unprecedented shift in national homicide patterns as

evidenced during the 1990s. Every American now has a realistic chance of murder victimization in view of the random nature the crime has assumed. This notion is somewhat supported by the fact that a majority of the Nation's murder victims are now killed by strangers or unknown persons. The advent of this trend has generated a profound fear of murder victimization in that the circumstances surrounding homicides are perceived to be more irrational. In the past, the accepted normality was based upon clearly defined circumstances such as felonies, passion, and arguments among family members or acquaintances. The concern about homicide is further perpetuated by youthfulness of both victims and offenders, as illustrated by the rise in juvenile gang killings during the past decade. The reasons for these changes in homicide patterns are multidimensional. Some suggested causal factors are related to the illicit drug trade, the disintegration of the family unit, and weapon proliferation.

SECTION VI

Law Enforcement Personnel

The Nation's law enforcement community employed an average of 2.3 full-time officers for every 1,000 inhabitants as of October 31, 1993. Considering full-time civilians, the overall law enforcement employee rate was 3.1 per 1,000 inhabitants according to 13,041 city, county, and state police agencies reporting in 1993. These agencies collectively offered law enforcement service to a population of over 244 million, employing 553,773 officers and 212,353 civilians. A listing of reported full-time law enforcement officers and civilian employees by state is shown in Table 77.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1993 was 2.8 per 1,000 inhabitants. The Nation's smallest cities, those with fewer than 10,000 inhabitants, employed an average of 3.5 employees per 1,000 population, while for the largest cities (over 250,000 population) the rate was 3.6 per 1,000. Cities with populations between 10,000 and 249,999 registered lesser rates ranging from 2.2 to 2.4 employees per 1,000 inhabitants. Rural and suburban counties averaged full-time law enforcement employee rates of 3.9 and 3.6 per 1,000 population, respectively. (See Table 70.)

Regionally, the law enforcement employee rate was highest in the South with 3.3, and lowest in the West, 2.4. (See Table 70.)

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.2 officers per 1,000 inhabitants. By population grouping, the rates ranged from 1.7 for cities with populations of 25,000 to 99,999 to 2.8 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.3 officers per 1,000 population, while agencies in rural counties averaged 2.6. (See Table 71.)

Geographically, the highest rates of officers to population were recorded in the Northeastern and Southern States where there were 2.5 officers per 1,000 inhabitants. Following were the Midwestern States with 2.1 and the Western States with 1.7.

Males comprised 91 percent of all sworn employees both nationally and in cities. Ninety-three percent of those in rural counties and 88 percent in suburban counties were males.

Civilian Employees

Civilians made up 28 percent of the total United States law enforcement employee force in 1993. They represented 22 percent of the police employees in cities, 34 percent in rural counties, and 37 percent of the suburban county law enforcement strength. Thirty-seven percent of all civilian employees were males.

Law Enforcement Officers Killed and Assaulted

Seventy law enforcement officers were feloniously slain in the line of duty during 1993, 7 more than in 1992. Accidents occurring while performing official duties claimed the lives of an additional 59 officers in 1993. The 1993 total for officers accidentally killed was 7 fewer than the 1992 total of 66.

Extensive data on line-of-duty deaths and assaults on city, county, state, and federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

Table 70. — Full-time Law Enforcement Employees[1], Number and Rate per 1,000 Inhabitants, Geographic Region and Division by Population Group, October 31, 1993

SECTION VII
APPENDIX I
Methodology

The information compiled by UCR contributors is forwarded to the FBI either directly from local law enforcement agencies or through state-level UCR Programs in 44 states and the District of Columbia. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond law enforcement control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations.

The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported as of October 31 each year.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook,* which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, letters to UCR contributors and State UCR Program "Bulletins" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the International Association of Chiefs of Police or the Committee on Uniform Crime Reporting of the National Sheriffs' Association.

NIBRS Conversion

Several states provided their UCR data in the expanded NIBRS format. For presentation in this book, NIBRS data were converted to the historical summary UCR formats. The NIBRS data base was constructed to allow for such conversion so that UCR's long-running time series could continue.

Offense Estimation

Tables 1 through 5 and 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies. The size of agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location are considered in the estimation process.

Because of efforts to convert to the National Incident-Based Reporting System, it has become necessary to estimate totals for some states during the transitional period. Crime counts for the states of Iowa in 1991 and Kansas and Illinois in 1993 were estimated using procedures based on data availability specific to each state. The Iowa conversion was successful and state figures for 1992 and 1993 were available. Kansas and Illinois are continuing conversion efforts. Within these two states, 1993 jurisdictional data are only available for Wichita, Kansas, and approximately 60 Illinois agencies still reporting under the summary format. These figures are shown in Tables 8 through 11.

For Iowa (1991) and Kansas (1993), state totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. For the year in question, percent changes for each offense within each population group of the geographic division in which the state resides were applied to the previous annual valid figures. The state totals were compiled from the sums of the population group estimates. (This same method was used to

estimate Florida and Kentucky totals for 1988 when there were reporting problems at the state levels.)

A different method was used to estimate 1993 Illinois totals. Since valid figures were available for some Illinois individual jurisdictions, those counts were maintained. The counts for the remaining jurisdictions were replaced with the most recent valid annual totals for previous years or were generated using standard estimation procedures. The results of all sources were then combined to arrive at the 1993 state total for Illinois.

The inability of some state UCR Programs to provide forcible rape figures in accordance with the UCR guidelines also required unique estimation procedures. The 1985 through 1993 Illinois and 1993 Michigan and Minnesota forcible rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to each state. Forcible rape figures are shown for a limited number of Minnesota agencies in this book's Tables 6 and 8 through 11.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States.* Valid percent changes for 2-, 5-, and 10-year periods are presented in this book's tabular portions.

Variation from Monthly Average

For the overall Crime Index, violent crime, property crime, and each Crime Index offense, charts titled "variation from monthly average" are shown in Section II. These charts present monthly seasonal indices and describe variations that arise from seasonal factors by eliminating the impact of crime trends or random factors. In order to stabilize the seasonal indices, the variations are based on the means of UCR data covering the most recent 10-year interval.

The variations are different from the data in the tables entitled "By Month, Percent of Annual Total" in two major respects: the latter is a percent distribution of a single year's statistics and 12 figures add to 100, whereas the former adds to zero. The second difference is that the latter (by month, percent of annual total) is not strictly a seasonal indicator because crime trend, for example, will have an impact on the monthly distribution.

Table Methodology

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 8 through 11, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated on varied levels of submission. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Designed to assist the reader, this appendix explains the construction of many of this book's tabular presentations. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States - 1993.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1993 statistics are consistent with Table 2. Pre-1993 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except 1970, 1980, and 1990, which are Bureau of the Census decennial census data (see App. III). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1974 to 1993.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1993, Bureau of the Census provisional estimates. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1993.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1993, Bureau of the Census provisional estimates (see App. III).	Represents the 1993 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1993 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1992 and 1993. Population statistics represent July 1 provisional estimates for 1992 and 1993 (see App. III).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic factors.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1993 estimates (see App. III). Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic factors.
6	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	Statistics are published for all Metropolitan Statistical Areas (MSAs) having at least 75% reporting and for which the central city/cities submitted 12 months of data in 1993. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1993. Population statistics represent July 1, 1993, Bureau of the Census provisional estimates. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (see App. II).	Represents an estimation of the reported crime activity for Index offenses at individual MSA level. Any comparison of UCR statistics should take into consideration demographic factors.
7	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	Offense totals are for all Index offense categories other than aggravated assault. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	Represents an estimation of national reported crime activity from 1989 to 1993. Aggravated assault is excluded from Table 7, because if money or property is taken in connection with an assault the offense is robbery.
8	All law enforcement agencies submitting complete reports for 12 months in 1993.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The agency populations are 1993 estimates for each agency (see App. III).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic factors.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
9	All university/college law enforcement agencies submitting complete reports for 12 months in 1993.	The 1992 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, and other demographic factors.
10	All law enforcement agencies submitting complete reports for 12 months in 1993.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1993 (see App. III).	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
11	All law enforcement agencies submitting complete reports for 12 months in 1993.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 1993 estimates for individual agencies (see App. III).	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparion of UCR statistics should take into consideration demographic factors.
12-15	All law enforcement agencies submitting complete reports for at least 6 common months in 1992 and 1993.	The 1993 crime trend statistics are 2-year comparisons based on 1993 reported crime activity. Only common reported months for individual agencies are included in 1993 trend calculations. Populations represent July 1, 1993, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 15 due to editing procedure and lower submission rate.
16-19	All law enforcement agencies submitting complete reports for 12 months in 1993.	The 1993 crime rates are the ratios of the aggregated 1993 crime volumes and the aggregated 1993 populations of the contributing agencies. Population statistics represent 1993 estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	The forcible rape figures furnished by the Illinois, Michigan, and Minnesota state-level UCR Programs were not in accordance with national guidelines. For inclusion in these tables, the forcible rape figures for these states were estimated by using the national rates for each population group applied to each state's population by group for agencies supplying all 12 months of data. Slight decrease in national coverage for Table 19 due to editing procedure and lower submission rate.
20	All law enforcement agencies submitting Supplementary Homicide Report (SHR) data in 1993.	The weapon totals are the aggregate for each murder victim recorded on the SHRs for calendar year 1993.	The SHR is the monthly report form concerning homicides. It details victim and offender characteristics, circumstances, weapons used, etc.
21, 22	All law enforcement agencies submitting complete reports for 12 months in 1993.	The weapon totals are aggregated 1993 totals. Population statistics represent 1993 estimates.	
23, 24	All law enforcement agencies submitting complete reports for at least 6 months in 1993.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1992 and 1993.	Aggravated assault is excluded from Table 23. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
25-28	All law enforcement agencies submitting complete reports for at least 6 months in 1993.	The 1993 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1993. Population statistics represents 1993 estimates. See Appendix III for UCR population breakdowns.	
29	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1993).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to 1993 Bureau of the Census provisional estimates; see App. III).	

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
30, 31	All law enforcement agencies submitting complete reports for 12 months in 1993.	The 1993 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1993 reported arrest statistics and population. The population statistics represent July 1, 1993, estimates. See Appendix III for UCR population classifications/geographical configuration.	
32, 33	All law enforcement agencies submitting complete reports for 12 months in 1984 and 1993.	The arrest trends are the percentage differences between 1984 and 1993 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1993, estimates (see App. III).	
34, 35	All law enforcement agencies submitting complete reports for 12 months in 1989 and 1993.	The arrest trends are the percentage differences between 1989 and 1993 arrest volumes aggregated from common agencies. Population statistics represent 1993 estimates (see App. III).	
36, 37	All law enforcement agencies submitting complete reports for 12 months in 1992 and 1993.	The arrest trends are 2-year comparisons between 1992 and 1993 arrest volumes aggregated from common agencies. Population statistics represent 1993 estimates (see App. III).	
38-43	All law enforcement agencies submitting complete reports for 12 months in 1993.		Slight decrease in coverage for Table 43 due to editing procedure and lower submission of race data.
44, 45	All city law enforcement agencies submitting complete reports for 12 months in 1992 and 1993.	The 1993 city arrest trends represent the percentage differences between 1992 and 1993 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
46-49	All city law enforcement agencies submitting complete reports for 12 months in 1992 and 1993.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 49 due to editing procedure and lower submission of race data.
50, 51	All suburban county law enforcement agencies submtting complete reports for 12 months in 1992 and 1993.	The 1993 suburban county arrest trends represent percentage differences between 1992 and 1993 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
52-55	All suburban county law enforcement agencies submitting complete reports for 12 months in 1993.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 55 due to editing procedure and lower submission of race data.
56, 57	All rural county law enforcement agencies submitting complete reports for 12 months in 1992 and 1993.	The 1993 rural county arrest trends represent percentage differences between 1992 and 1993 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 55 due to editing procedure and lower submission of race data.
58-61	All rural county law enforcement agencies submitting complete reports for 12 months in 1993.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 61 due to editing procedure and lower submission of race data.
62, 63	All suburban area law enforcement agencies submitting complete reports for 12 months in 1992 and 1993.	The 1993 suburban area arrest trends represent percentage differences between 1992 and 1993 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
64-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1993.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 67 due to editing procedure and lower submission of race data
68	All law enforcement agencies submitting complete reports for 12 months in 1993.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1, 1993, estimates (see App. III).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1993.	Population statistics represent July 1, 1993, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery.—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc .

The Part II offenses are:

Other assaults (simple).—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.—Buying, receiving, and possessing stolen property, including attempts.

Vandalism.—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice).—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.—State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs. The following drug categories are specified: Opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, benzedrine).

Gambling. — Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children. — Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence. — Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws. — State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness. — Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct. — Breach of the peace.

Vagrancy. — Vagabondage, begging, loitering, etc.

All other offenses. — All violations of state or local laws, except those listed above and traffic offenses.

Suspicion. — No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18). — Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18). — Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

Uniform Crime Reporting Area Definitions

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of counties but outside cities, while local police report crimes committed within the city limits.

Community Types

UCR data are often presented in aggregations representing three types of communities:

1. Metropolitan Statistical Areas (MSAs) – Each MSA includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county are also included. Counties in an MSA are designated "suburban" for UCR purposes. An MSA may cross state lines. The MSA concept facilitates the analysis and presentation of uniform statistical data on metropolitan areas by establishing reporting units which represent major population centers. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of data for those areas should be attempted.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 79 percent of the total United States population in 1993. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded. The concept of suburban area is especially important because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

2. Cities Outside MSAs – Cities outside of MSAs are mostly incorporated. They comprised 8 percent of the 1993 population of the United States.

3. Rural Counties Outside MSAs – Rural counties are comprised of mostly unincorporated areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies serviced 12 percent of the national population in 1993.

The following is an illustration of the community types:

<table>
<tr><th></th><th>MSA</th><th>NON-MSA</th></tr>
<tr><td rowspan="2">CITIES</td><td>CENTRAL CITIES 50,000 AND OVER</td><td rowspan="2">CITIES OUTSIDE METROPOLITAN AREAS</td></tr>
<tr><td>SUBURBAN CITIES</td></tr>
<tr><td>COUNTIES (including unincorporated areas)</td><td>SUBURBAN COUNTIES</td><td>RURAL COUNTIES</td></tr>
</table>

Population Groups

The population group classifications used by the UCR Program are:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City[1]	Less than 10,000
VIII (Rural County)	County[2]	N/A
IX (Suburban County)	County[2]	N/A

[1]Includes universities and colleges to which no population is attributed.
[2]Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. In this edition, the state and national population figures are 1993 Bureau of the Census provisional estimates. Population figures for individual jurisdictions were updated by applying 1993 state growth rates to 1992 city and county estimates supplied by Census. The United States population estimate showed a 1-percent increase in 1993 over 1992.

The following table shows the number of UCR contributing agencies within each population group for 1993.

Population Group	*Number of Agencies*	*Population Covered*
I	65	46,376,045
II	139	20,492,390
III	374	25,590,699
IV	718	24,853,627
V	1,733	27,271,751
VI[1]	7,889	25,251,795
VIII (Rural County)[2]	3,615	31,835,208
IX (Suburban County)[2]	1,974	55,962,485
Total[3]	16,507	257,908,000

[1]Includes universities and colleges to which no population is attributed.
[2]Includes state police to which no population is attributed.
[3]Because of Bureau of the Census rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England
- Connecticut
- Maine
- Massachusetts
- New Hampshire
- Rhode Island
- Vermont

Middle Atlantic
- New Jersey
- New York
- Pennsylvania

MIDWESTERN STATES

East North Central
- Illinois
- Indiana
- Michigan
- Ohio
- Wisconsin

West North Central
- Iowa
- Kansas
- Minnesota
- Missouri
- Nebraska
- North Dakota
- South Dakota

SOUTHERN STATES

South Atlantic
- Delaware
- District of Columbia
- Florida
- Georgia
- Maryland
- North Carolina
- South Carolina
- Virginia
- West Virginia

East South Central
- Alabama
- Kentucky
- Mississippi
- Tennessee

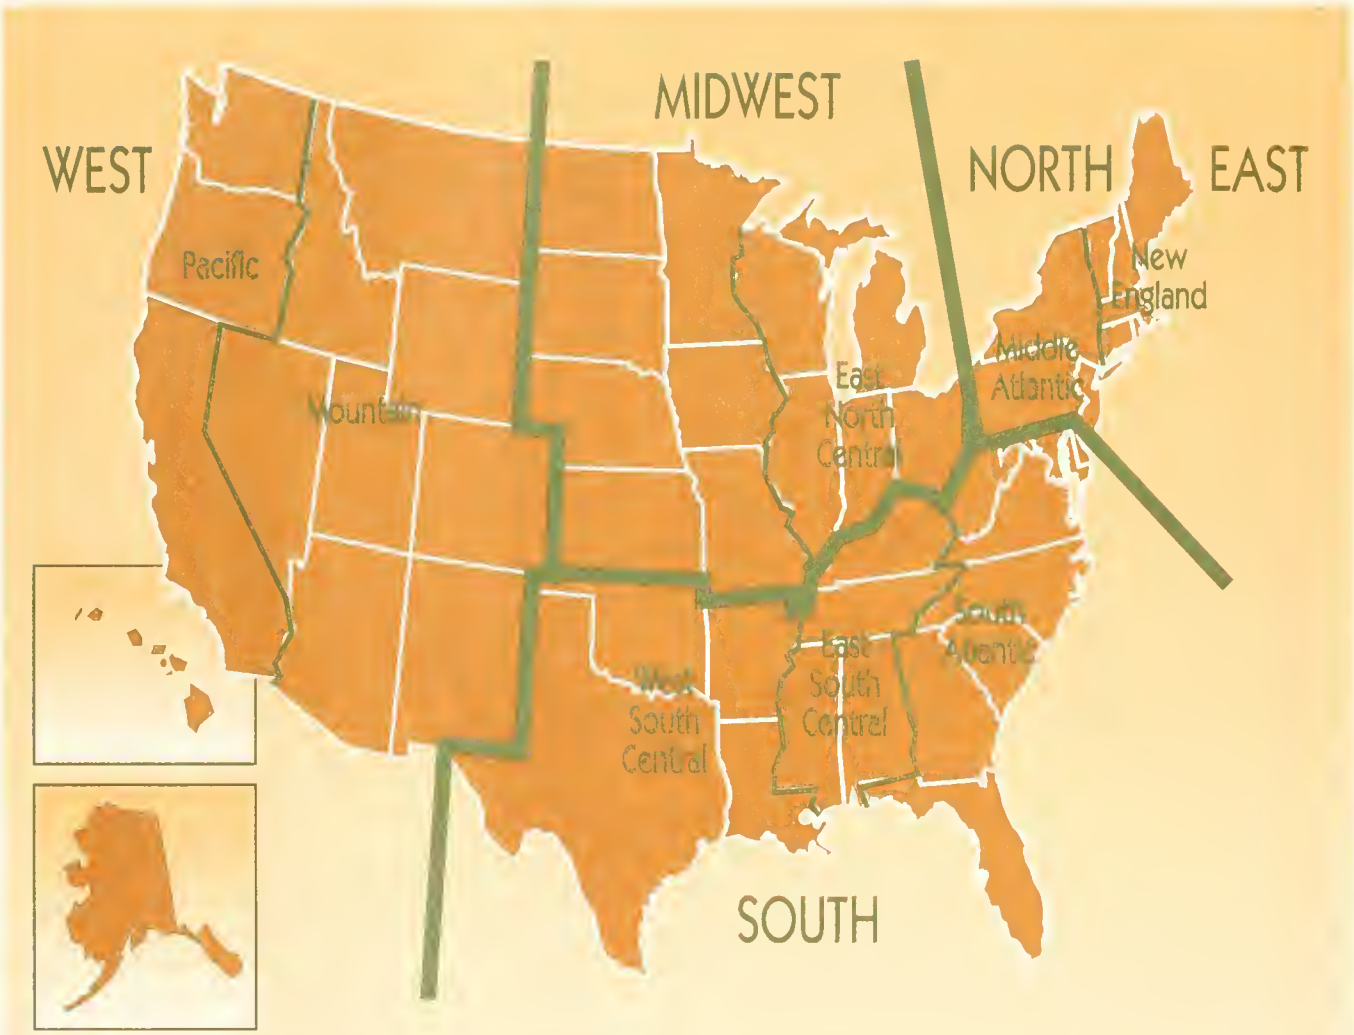
West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

WESTERN STATES

Mountain
- Arizona
- Colorado
- Idaho
- Montana
- Nevada
- New Mexico
- Utah
- Wyoming

Pacific
- Alaska
- California
- Hawaii
- Oregon
- Washington

REGIONS AND DIVISIONS OF THE UNITED STATES



APPENDIX IV

The Nation's Two Crime Measures

The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the Nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Because of differences in methodology and crime coverage, the results from the two programs are not strictly comparable nor consistent. By complementing each other's findings, the two programs enhance our understanding of the Nation's crime problem.

Uniform Crime Reports

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

The UCR data are compiled from monthly law enforcement reports made directly to the FBI or to centralized state agencies that then report to the FBI. Each report submitted to the UCR Program is examined thoroughly for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies.

In 1993, law enforcement agencies active in the UCR Program represent approximately 245 million United States inhabitants — 95 percent of the total U.S. population.

The UCR Program provides crime counts for the Nation as a whole, as well as for regions, states, counties, cities, and towns. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

UCR findings for each calendar year are published initially in a preliminary release in the spring followed by a detailed annual report, *Crime in the United States*, issued in the following calendar year. In addition to information on crime counts and trends, this report includes detailed data on crimes cleared, persons arrested (age, sex, race) for a wide range of crimes, law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders, victim-offender relationships, weapons used, and circumstances surrounding the homicides). Other special reports are also available from the UCR Program.

Following a 5-year redesign effort, the UCR Program is currently converting to a more comprehensive and detailed reporting system, called the National Incident-Based Reporting System (NIBRS). NIBRS will provide detailed information about each criminal incident in 22 broad categories of offenses.

National Crime Victimization Survey

The Bureau of Justice Statistics' (BJS) NCVS, which began in 1973, collects detailed information on the frequency and nature of the crimes of rape, personal robbery, aggravated and simple assault, household burglary, personal and household theft, and motor vehicle theft. It does not measure homicide or commercial crimes (such as burglaries of stores).

Interviews are conducted by U.S. Census Bureau personnel with all household members at least 12 years old in a nationally representative sample of approximately 49,000 households (about 101,000 persons). Households stay in the sample for 3 years and are interviewed at 6-month intervals. New households rotate into the sample on an ongoing basis.

The NCVS collects information on crimes suffered by individuals and households, whether or not those crimes were reported to law enforcement. It estimates the proportion of each crime type reported to law enforcement, and it details the reasons given by victims for reporting or not reporting.

The survey provides information about victims (age, sex, race, ethnicity, marital status, income, and educational level), their offenders (sex, race, approximate age, and victim-offender relationship), and the crimes (time and place of occurrence, use of weapons, nature of injury, and economic consequences). Questions also cover the experiences of victims with the criminal justice system, details on self-protective measures used by victims, and possible substance abuse by offenders. Periodically, supplements are added to the survey to obtain detailed information on special topics such as school crime.

Findings from the NCVS for each calendar year are published in a press release the following April (preliminary data), in a BJS Bulletin in the fall presenting summary final data, and in a detailed report the following June

covering all NCVS variables. Each year BJS staff develop Special and Technical Reports on specific crime topics.

Comparing UCR and NCVS

As the previous description illustrates, there are significant differences between the two programs. The NCVS, for example, includes crimes both reported and not reported to law enforcement, but it excludes homicide, arson, commercial crimes, and crimes against children under age 12 (all of which are included in the UCR Program). The UCR captures crimes reported to law enforcement, but it excludes simple assaults from the Crime Index. Moreover, even when the same crimes are included in the UCR and NCVS, the definitions vary.

Another difference is the way that rate measures are presented for crimes such as burglary, household theft, and motor vehicle theft in the two programs. The UCR rates for these crimes are largely per-capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per-household (number of crimes per 1,000 households). Because the number of households may not grow at the same rate each year as the total population, trend data for rates of household crimes measured by the two programs may not be comparable.

In any large-scale data collection program, there are many possible sources of error. For example, in the UCR Program, a police officer may classify a crime incorrectly, and in the NCVS, a Census Bureau interviewer may incorrectly record the responses given by a crime victim. Crime data may also be affected by how the victim perceives and recalls the event. Moreover, as data are compiled and processed, clerical errors may be introduced at any stage. Both the UCR and NCVS programs employ extensive accuracy checks at various stages in the data collection process to minimize errors.

As noted above, the NCVS is based on an extensive, scientifically selected sample of American households. Thus, every crime measure presented in NCVS reports is an estimate for the Nation based on results obtained from the sample. Estimates based on a sample have sampling variation, or a margin of error (which defines a confidence interval) associated with each estimate. This means that if another sample is drawn, there is a certain probability that the resulting estimate would be somewhat different from the original one. If the survey were repeated many times with different samples, the resulting estimates would cluster around the actual measure for the entire population. Rigorous statistical methods are used for calculating the magnitude of the sampling variation associated with the NCVS estimates. Trend data in NCVS reports are described as genuine year-to-year changes only if there is at least a 90% certainty that the measured changes are not the result of sampling variation. The UCR data are based on the actual count of offenses reported by law enforcement jurisdictions. In some circumstances, UCR data are estimated for nonparticipating jurisdictions or those reporting partial data.

Some differences in data from the two programs may result from the fact that NCVS estimates are subject to sampling variation. Apparent discrepancies between statistics from the two programs can usually be resolved by comparing NCVS sampling variations (confidence intervals) with UCR statistics. Year-to-year changes in individual crime categories reported by the UCR usually fall within the confidence intervals of the NCVS estimates, indicating no statistically significant differences between the output of the two programs. Even should the UCR changes fall outside the intervals, incompatibility of statistics should not be assumed. To illustrate, when differences between UCR and NCVS occur, there is a 10% chance they are due to sampling variation because of the 90% confidence level established by NCVS. It should also be noted that definitional and procedural differences between the UCR and NCVS programs can account for apparent discrepancies in data output.

As has been discussed throughout, the results of UCR and NCVS are not strictly comparable for a variety of reasons. Data users, however, possessing the basic understanding of each program's objectives, methodology, and coverage, can use the output from each in a complementary manner to better assess crime occurrence, losses, law enforcement involvement, arrestee descriptive information, and victimization data. By properly utilizing both programs in tandem, the crime issues in this country can be viewed in a much broader, more complete scope.

APPENDIX V

Directory of State Uniform Crime Reporting Programs

Alabama	Alabama Criminal Justice Information Center Suite 350 770 Washington Avenue Montgomery, Alabama 36130 (205) 242-4900 x 225

Evaluation Form For
Crime in the United States - 1993

1. For what purpose did you use this issue of *Crime in the United States?*

2. Was the publication adequate for that purpose?

   ____ Quite adequate ____ Somewhat adequate ____ Quite inadequate
   ____ Adequate ____ Not Adequate

3. Are there presentations not included that you would find particularly useful?

4. What changes, if any, would you recommend for subsequent issues?

5. Can you point our specific table notes or presentations which are not clear or additional terms which need to be defined?

6. In what capacity did you use *Crime in the United States?*

   ____ Criminal justice/law enforcement agency employee *(specify functional area)*
   ____ Other government employee
   ____ Private citizen
   ____ Educator
   ____ Researcher
   ____ Student
   ____ Legislator
   ____ Media
   ____ Other *(specify)*

7. Add any additional comments you care to make.
